DUNES

Introduction

The most fragile areas of Michigan's dunes can be protected while balancing the benefits of economic development, multiple human uses and benefits of public access and enjoyment. Through the protection of steep, erosive slopes, using alternative construction techniques to reduce the impacts of development on dunes, and protecting dune vegetation essential to dune preservation and stability Michigan's critical dune areas are protected. Earthmoving, vegetation removal, and construction activities within a critical dune area are regulated through a permit program.

MINERAL WELLS

Mineral resources such as salt, potash, and natural mineral brines are important to many Michigan Industries including the chemical, pharmaceutical, and agricultural industries.

The DEQ Office of Oil, Gas, and Minerals administers Part 625: Mineral Wells of the NREPA governing well location, drilling, operation, plugging, and restoration for solution mining wells, certain types of brine production/disposal wells, and exploration test wells associated with metallic mining.

MINING

Michigan Mining, Minerals, and Reclamation

Michigan has a long history of mining that goes back to prehistoric time. Recent updates to regulatory and revenue structures have improved the effectiveness and transparency of the state's approach to mining operations. The State of Michigan has prepared a multi-disciplinary mining guide to provide an introduction and overview of the processes required for mining exploration and permitting. This guide is available in the Mining Guidebook.

The DEQ Office of Oil, Gas, and Minerals (OOGM) regulates several mining industries in Michigan, including metallic mining, sand dune mining, and coal mining. There are also several other important mineral commodities such as gypsum, dimension stone, limestone, and aggregate that are mined in Michigan but are not regulated by the OOGM. These industries, although not requiring a mining permit from the OOGM, may be subject to federal, state, or local air, water, or land use permits.

OIL AND GAS

The DEQ Office of Oil, Gas, and Minerals staff monitor oil and gas well drilling operations, brine disposal, oil and gas production facilities, and gas storage wells. Permits have been issued for over 60,000 oil and gas wells in the state. OOGM activities include permit application reviews, field reviews, compliance inspections, enforcement, and spill response. The Division has implemented a computerized system that allows the electronic entry and tracking of oil and gas well applications, field inspection activities, compliance cases, and production information. This system also electronically issues oil and gas permits and well transfers. Formal hearings are held before the Supervisor of Wells to receive evidence pertaining to the administration of Part 615, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA), and promulgated rules.

REMEDIATION

Introduction

Remediation includes response activities to manage and reduce risks at sites of environmental contamination. This may be achieved through activities such as initial evaluation, interim response, remedial investigation, feasibility studies, remedy construction, operation and maintenance of systems, land and resource use restrictions, and monitoring. You can access documents here that will help you understand the requirements for these activities, including links to laws, administrative rules, department forms, guides, and technical assistance documents.

REDEVELOPMENT

[Pix and Introduction]

Brownfield properties are those in which the redevelopment or reuse of the property may be complicated by the presence or perception of contamination. Revitalizing and redeveloping these properties protects the environment, reuses existing infrastructure, minimizes urban sprawl and creates economic opportunities. The Remediation and Redevelopment Division provides financial and technical assistance including grants, loans, tax increment financing and free site assessments to facilitate the redevelopment of brownfield properties. You can find more information on those programs below.

REMEDIATION TAB

Response activity to address sites of environmental contamination generally proceeds in a sequence of steps, which can include initial evaluation, interim response, remedial investigation, remedial action, operation and maintenance, and monitoring. You can access documents here that will help you understand requirements for those steps, including remedial action plan requirements and Michigan's land-use based cleanup criteria.

"We are working closely with Genesee County and the Flint community, taking actions to immediately improve the water situation in Flint. Currently, we are focused on water testing, lead testing for children, and ensuring every home has water filters. We are also at work on long-term solutions, including follow-up care for affected residents."

-- Governor Rick Snyder

From the Governor

- Governor Rick Snyder

•

Rick Snyder became Michigan's 48th governor when he was sworn into office for a second term on Jan. 1, 2015. In his inaugural address, he described his vision for reinventing Michigan by creating more and better jobs, revitalizing the educational system, and revamping government to focus on providing excellent service to its customers, the state's 10 million people.

Mobile Michigan

- Mobile technology is changing the way people find and use information and services. Residents and tourists can access real-time links to all things Michigan - from viewing incidents and current traffic speed data in MiDrive to reserving a campsite in the Central Reservation System. We're responding to your needs by adopting more mobile-friendly services that you can access anytime, anywhere. You can see our menu of applications below, but be sure to check back often for our latest additions!

MiPage

MiPage is a free application that serves as your real-time link to all things Michigan. Tell us your favorite places in Michigan and we'll give you the latest news and events for those locations. Use the map to find a State office or a great campground. Browse the mobile ready applications to get information about job openings or find out where to vote. Or use the Search feature to find information you need and save it as a Favorite resource.

myHealthButton

The mobile myHealthButton application is a one stop shop for your Michigan Medicaid, Children'Â€Â™s Special Health Care Services (CSHCS) and MIChild coverage information. You can view real time information such as the services you are covered for, look up providers, access your mihealth card and much more, all at your fingertips. It's fast and simple.

Branch Office Locator icon Branch Office Locator The Secretary of State Branch Office Locator is a handy tool designed to help you find information on office locations, fax numbers and service hours. It will also direct you to offices that provide special services such as instant titles, mechanic testing, Self-Service Stations, Saturday hours and more!

eMichigan Accomplishments

RE: The Michigan.gov Support Team within eMichigan Web Development

Flint Water:

Michelle Stiffler reorganized the Flint Water website per Caleb Buhs' request Friday, 1/15. The Flint Water Response Team approved new layout on Friday, late in the afternoon, and requested it be implemented immediately. Michelle went home, logged on at 6:00 PM, worked continuously and completed the project at 3:00 AM Saturday morning.

Michelle was also on-call during this period, and answered seven calls for updates to the Flint Water website on Saturday 1/16, as well as two on Sunday 1/17. These calls included uploading files during the DDOS attack, having to bypass the CMA and upload via Vignette Development Tools. Only Michigan.gov Support staff (5 of us) can do this within the SOM. Michelle had to first OCR all files (PDFs) as they were not accessible. Sunday's calls involved updating two of the documents posted Saturday, which included the MSP director's and one other high-ranking official's cell phone numbers. Michelle had to fix the redaction in the updated files that were sent to her as it was not done correctly. Michelle also provided instruction on how to redact a PDF for future reference. Michelle also pointed out the link in the Gov's newsletter regarding Flint Water was incorrect and needed to be updated in the GovDelivery template. Michelle noticed on Thursday 1/21 that it STILL was not updated, and notified her contact in the Gov's office directly, receiving a very quick 'thank you very much' in response.

State of the State (SOTS) 2016:

Multiple eMI staffers (Joe Seckelman, Rick Peterson, John Estill) were involved in structuring the web page and releasing information at the start of the SOTS Tuesday 1/19, including coordinating the streaming video. Earlier in the afternoon, the email newsletter pushed from the Governor's office had the wrong time for the start of the SOTS, John Estill notified his contact in the Gov's office immediately and the Gov staffer was able to push a correction out prior to anyone in the Gov's office noticing the error. We like to take care of our people, no matter what level they are.

Wednesday's excitement involved aiding in the coordination of the release of the emails from Governor Snyder's email archive and consulting on a location to host them for the public. The 31 MB file was a risk for uploading to the Michigan.gov portal as the amount of traffic downloading the file would have been difficult to estimate.

MSHDA site redesign:

MSHDA site administrator, Matt Schoener, parked himself in the eMichigan Collaboration Area to get undivided attention from John Estill who is working with him on new layouts for the site. John blocked off several hours for collaboration; having the customer come to our area keeps others (I won't name anyone here) from interrupting their work. At the same time, our customers that come to the office get to see (or over-hear) first-hand how much we have going on.

The HP TRIM configuration detailed below is the configuration to be built in SOM1 for production. We understand that we may request future changes, additions and deletions but that by agreeing to this configuration this will be the initial configuration to be used in fulfilling our HP TRIM Charter and moving into production.

File Plan Configuration:

User Access:

Users will be a part of one of two available groups at the functional level in order to access records within this configuration:

DEQ-CIP-Flint-Modify
DEQ-CIP-Flint-View

At this time, only one user will belong to either of these groups:

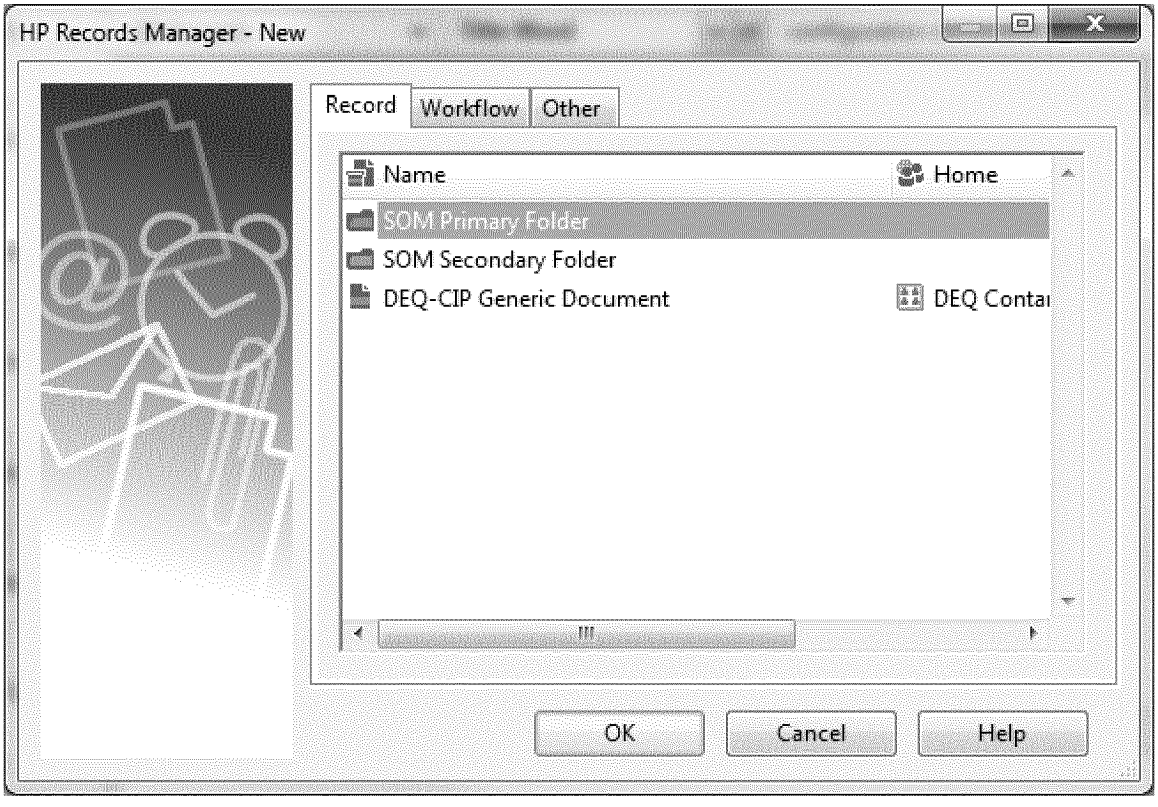
Michael Marshall: DEQ-CIP-Flint-Modify

Record Retention and Disposal Schedule Application

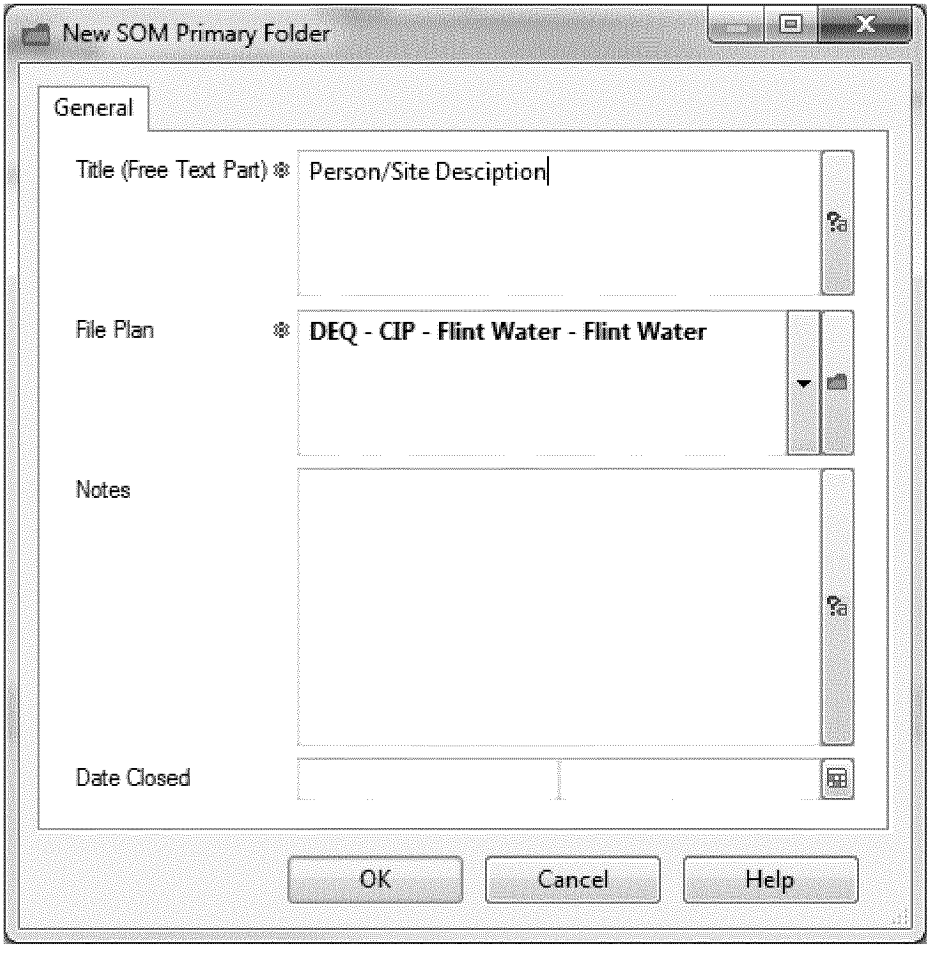
The following record retention and disposal schedules will be applied to the following file plans:

File Plan	Retention Series	Series Name	Retention
Flint Water	None	**Special project to identify records related to the Flint water contamination for DEQ executives, Auditor General, Attorney General, and others as necessary**	Records will be redistributed to the appropriate location/file plan/retention series upon completion of the project

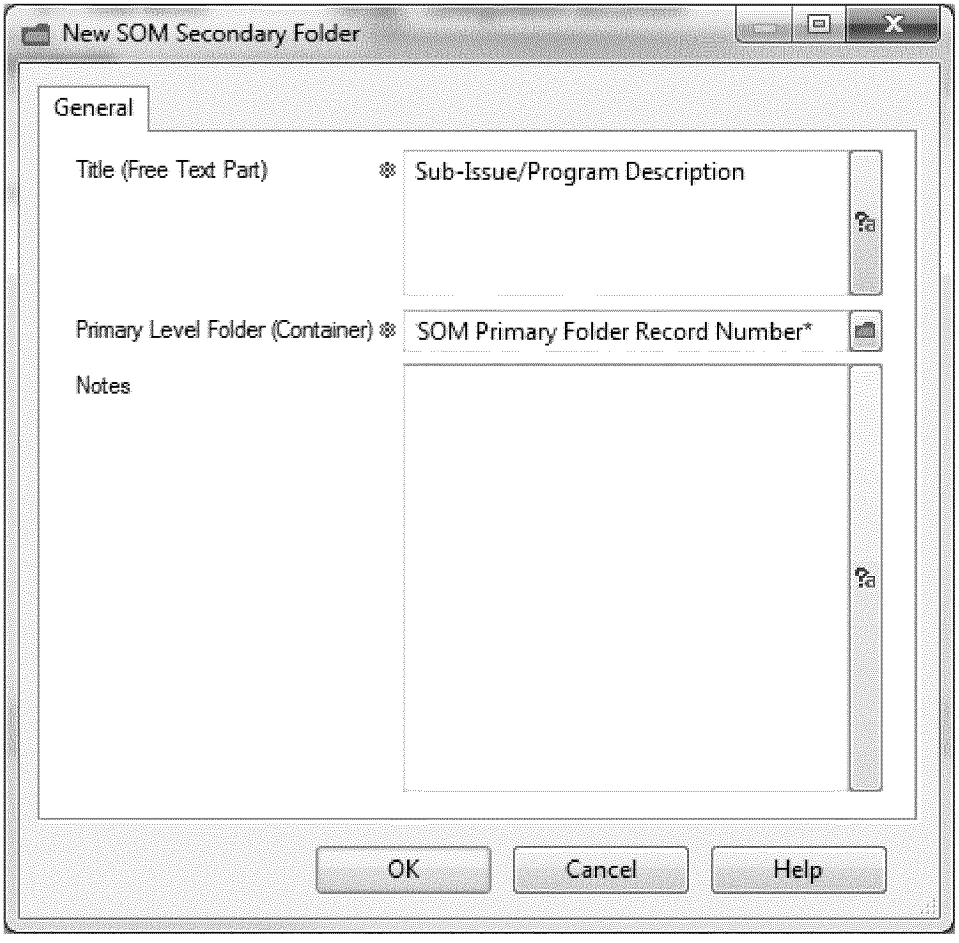
Retention will not be applied to files within this configuration.



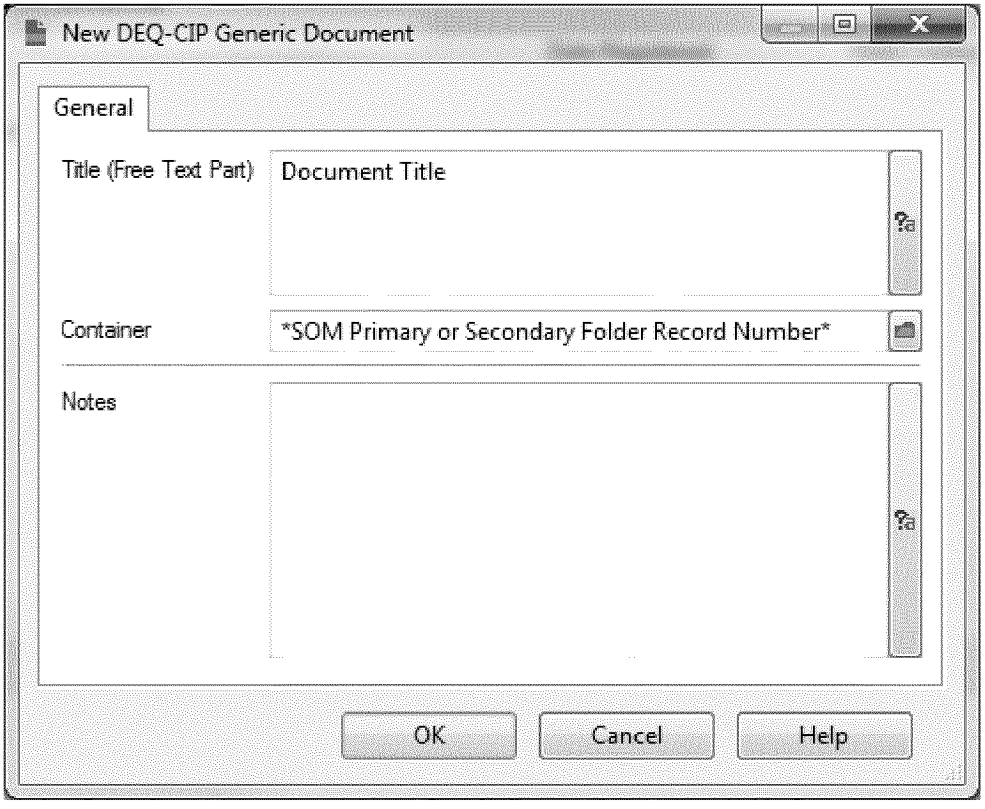
Record Type Configuration:



Use SOM Primary Folder for person/site files.



Use SOM Secondary Folder for sub-issue/program files.



Use DEQ-CIP Generic Document Type for all documents.

Subject: RE: Disposal Notice for 39/DEH Batch 8595

I agree. It pre-dates the current incident, but could have useful historical perspective for the current situation. Put it on hold and put Flint Lead in the litigation hold note. Cases have been filed already, but I don't know if AG has issued any hold notices yet. Thanks.

Angela,

I was just discussing this notice with Corie Weber and pulled up the notice to see what the box contained. The content listed shows documentation on Genesee County regarding lead poisoning monitoring and remediation. We feel that in light of the current issues with the Flint water supply that this box should be placed on hold and not destroyed.

Jacqui/Leslie,

If you would like to pull the box so you can review the contents, please do a request through Versatile.

Thanks, all!

Carol

Hi Angela,

I'm sorry, but I was out sick last week and have been trying to get caught up. Can we just pull the box for review and note afterwards whether or not it can be destroyed?

Please advise,
Carol

Subject: Disposal Notice for 39/DEH Batch 8595

Due Date: 12/30/15
Please reply by e-mail

Attached is a Disposal Notice for boxes that are currently stored at the State Records Center. In compliance with an approved Retention and Disposal Schedule, these boxes will be destroyed. These records will be destroyed by the State of Michigan's vendor for confidential destruction services.

You must authorize this destruction before the State Records Center proceeds. After reviewing the notice, please respond back to me indicating approval of the destruction.

Please include the department code and the batch number in the subject line of the e-mail response for tracking purposes.

Retention and Disposal Schedules are legal documents signed by the agency and approving agencies that specify how long records will be retained, and whether they will be destroyed or transferred to the Archives of Michigan for permanent preservation. Occasionally, there are exceptional reasons why records cannot be destroyed at the specified time. For example, the records may be needed for litigation, FOIA request, audit, or an investigation. If any of these situations are taking place, please specify the reason in your response to the notice (please indicate the name of the litigation, if applicable), and how much longer the records need to be held to resolve this situation.

Sometimes agency practices change and the approved retention period no longer meets the agency's needs. You can request a schedule revision in the response to this notice, if this is the situation. A records analyst will contact you to revise the schedule. The records will be held until the schedule revision is completed, and the newly approved retention period is met.

If you identify any inaccuracies with the Versatile data that is included in the notice (such as an incorrect agency owner or record series), please notify me in your response. Please keep in mind that boxes on this notice may have been stored beyond their retention period, if they were put on a retention hold that is no longer in effect.

Charter
between the
MICHIGAN DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
OFFICE OF SUPPORT SERVICES
RECORDS MANAGEMENT SERVICES
and the
MICHIGAN DEPARTMENT OF *ENVIRONMENTAL QUALITY*
Regarding
RECORDS MANAGER IMPLEMENTATION & USE
for
FLINT SPECIAL PROJECT

This Agreement is between the Michigan Department of Technology, Management & Budget, Office of Support Services, Records Management Services (RMS) and the Michigan *Department of Environmental Quality Flint Special Project*, herein referred to as "Agency". The effective date for this agreement is the date of last signature (see section M).

A. Project Representatives

RMS consists of Records Management Services' (DTMB-RMS) staff and Information Technology support staff (DTMB-IT) with specialized knowledge in administering imaging and document management solutions within the State of Michigan's technology infrastructure. RMS is responsible for the governance of Records Manager and other document management tools and services provided by them.

IMPLEMENTATION SPONSORS
RMS: *Brice Sample*
Agency: *Barbara Schaibly*

IMPLEMENTATION TEAM
RMS Analyst(s): *Jessie Weston*
Agency Implementation Leader(s):*Mike Marshall*
Agency Local Coordinator(s): *Mike Marshall*
Core End Users: *Name*

B. Purpose

The purpose of this Charter is to set forth in writing the terms and conditions under which RMS shall implement Records Manager as a desktop document management system in the agency specified above.

This Charter is intended to:

- Establish mutual accountability and responsibility.
- Describe requirements, processes and procedures.
- Define the scope for the implementation and use.

This agreement provides for the initial implementation and configuration of the Records Manager product for the specified agency and any ongoing maintenance, support, or expansion.

C. Scope

Functions of the Records Manager software include, but may not be limited to: Records Management, Document Management, Image Management, and Workflow. All services are included, as long as business needs can be met using Records Manager "out of the box" (without software coding or programming). Additional rated services are also available.

Users from multiple departments in the State of Michigan will use this configuration as a centralized solution for gathering information for FOIA and legal requests concerning the Flint water crisis. For DEQ, records will be imported to Records Manager by one to two previously trained staff members and then reviewed for content by 20 staff members. Records will be stored for review by subject matter. Copies will be created as needed to respond to FOIA and legal requests.

During the course of this implementation, the following aspects of the system will be addressed, and all necessary tasks will be completed:

- *Configuration*
- *User training*

The following table represents major milestones in the project and roles and responsibilities of key parties throughout the project phases. Each milestone will require approval to move forward.

Major Milestones	RMS Analyst(s)	Agency Sponsor	Agency Implementation Leader(s)	Agency Local Coordinator(s)	End Users
Charter	*Draft charter*	*Define scope, review and sign charter*	*Identify record collections, review and sign charter*	*Review charter and provide input*	
Configuration	*Draft configuration approval document*		*Review and approve configuration*	*Review and provide input on configuration*	
Production	*Built production environment*		*Review production environment for compliance with configuration approval document*	*Review production environment for compliance with configuration approval document*	
Training	*Install seats, design agency-specific training, conduct training*		*Assist with coordination of seat installation, deliver training materials to users, coordinate training*	*Attend training*	*Attend training*

D. Definition of Roles

Implementation Team

This group consists of RMS resources (as assigned), the Agency Implementation Leader(s), Agency Local Coordinator(s), and Core End Users (as necessary).

RMS

A group made up of individuals with expertise in document management, document imaging, records management, file plan development, legal requirements, and best practices as they relate to government records. This group will assist an agency in identifying and evaluating potential document management implementations, including recommending a solution.

General Responsibilities:

- Coordinate the ongoing maintenance of the various tools for implementing a solution, and any other contractual components managed by RMS
- Procure services provided by DTMB-IT as they relate to hosting and managing the system technology

Agency Sponsor

This person will authorize and approve any expenditure related to the implementation and application of Records Manager. The Agency Sponsor must authorize the purchase of any new seats beyond the purchase identified in this charter, and the relinquishment of any existing seats. The Agency Sponsor has the sole authority to de-commission the agency's Records Manager application or any portion of it.

General Responsibilities:
- Review and approve Charter
- Assign agency resources as necessary

Agency Implementation Leader(s)
This individual is generally a mid-level manager, analyst, or other authority over the unit with knowledge of its business functions. It is critical that the Agency Implementation Leader maintain an environment of cooperation and open communication between the members of the Implementation Team(s) and also with the end users.

General Responsibilities:
- Coordinate an overview meeting for all future end users early in the process
- Assist in review of current business processes, existing infrastructure, resources, etc.
- Assist in preparing documentation (Charter, file plans, training materials, etc.)
- Coordinate activities of the Implementation Team on the agency side
- Facilitate meetings with RMS, End Users and Agency Local Coordinator(s)
- Assign agency resources (as necessary)
- Coordinate testing of the configuration to ensure it meets the functional area's needs
- Review and approve the final configuration document
- Oversee agency resources to ensure assignment deadlines are met so the project stays on schedule
- Assign seats and establish user security for initial implementation
- Coordinate attendance of user training

Agency Local Coordinator(s)
There will be at least one Agency Local Coordinator for each implementation; two Agency Local Coordinators are required for agencies with more than five users. The individual(s) should bring specific process-related expertise to the implementation process and maintain an environment of cooperation and open communication between the members of the Implementation Team and the End Users. Local Coordinators must be users in the agency that they represent.

Agency Local Coordinators should be comfortable with using a computer and using Records Manager, and comfortable helping others with their computer and with Records Manager. They should be able to identify what kind of problems a user is having (Records Manager, local computer, network access, scanner, etc.) and know how to get further assistance in resolving the issue.

General Responsibilities:
- Attend either agency-specific training or Records Manager 101

- Attend the Local Coordinator Records Manager training
- Assist in coordinating an overview meeting for all future end users early in the process
- Assist in review of current business processes, existing infrastructure, resources, etc.
- Assist in review of record retention requirements
- Assist RMS resources with configuration of Records Manager
- Coordinate communication and meetings with agency resources
- Assist in coordinating testing of the configuration to ensure it meets the functional area's needs
- Assist in developing training for end users
- Print and distribute training manuals
- Assist in coordinating attendance of user training
- Serve as the first line of contact for end user questions or support
- Serve as the agency-authorized requestor for all Records Manager security and file plan changes
- Assist RMS resources with ongoing maintenance of Records Manager configuration
- Coordinate the pre-implementation organization, clean-up and de-duplication of records in the agency (email, shared drives, existing storage, etc.)
- Provide on-going assistance to all users and promote best practices of Records Manager

Core End Users

The Core End Users will represent each functional area during the configuration phase. These individuals should be available as needed throughout the configuration phase to provide information about the functional area's document management needs and to assist with decision-making.

General Responsibilities:

- Assist in review of current business processes, existing infrastructure, resources, etc.
- Assist in review of record retention requirements
- Assist RMS resources with configuration of Records Manager
- Testing of the configuration to ensure it meets the functional area's needs
- Provide on-going assistance to all users and promote best practices of Records Manager
- Attend user training

Agency End Users

It is essential that end users are consulted throughout the implementation process, and that they receive sufficient training to use the tools that are provided to them. End user support of the tools and the business process changes that will take place is critical to the success of the implementation.

General Responsibilities:

- Attend orientation and other meetings
- Attend user training

- Communicate configuration, support, technical, or functional issues to Agency Local Coordinator(s)
- Use the software tools for maintaining official records

E. Operational Responsibilities

RMS operational responsibilities include:

- Establishing a file plan structure for managing content created using desktop applications (regardless of format).
- Providing security of agency content to authorized individuals (as defined by the agency).
- Configuring permissions for agency users, as necessary for implementation.
- Facilitating the disposal of records in accordance with approved Retention and Disposal Schedules.
- Training Agency's Implementation Team at the onset of the project.
- Training End Users at the onset of the initial implementation.
- Designing training tools for users to maximize the benefits and features of the software.

Agency operational responsibilities include:

- Migrating existing content (email, shared drives, paper files, etc.) into Records Manager, which may require a separate charter with DTMB-IT and additional resources.
- Extracting images and related metadata from the agency's legacy document management system and delivery to RMS in the required format. This may require additional DTMB-IT resources and a third party contractor.
- Importing migrated images and metadata from legacy system.
- Importing day-forward images and metadata delivered from vendor.
- Bulk/batch scanning operations and all uploading processes.
- Purchasing, leasing or renting any type of equipment.
- Designing a cost-benefit analysis of Records Manager, compared to the cost of the current system (actual costs, cost avoidance and efficiency). [RMS will assist with this analysis.]
- Ensuring that all Records Manager users are M-1 enabled and/or otherwise connected to and managed within the SOM domain.
- Ensuring that all the PCs with Records Manager installed meet the current Records Manager software computer specifications.
- Conducting regular meetings to discuss and implement consistent filing practices, naming conventions, etc. is highly recommended, and will facilitate cultural change.

F. Implementation Plan

1. Records Manager Initial Planning Meeting
    - Prepare, finalize and sign Charter
    - Prepare Records Manager Orientation
    - Initiate software installation for Implementation Team (RMS)

2. Records Manager Orientation (presented by Implementation Team to future end users)

- Records Manager introductory demonstration
- Review steps of the implementation process
- Identify roles and responsibilities

3. Records Manager Configuration

- Review the agency's Retention and Disposal Schedule (draft initial revisions)
- Analyze organization (organization charts, functional levels) in order to establish home/owner locations, user roles/profiles
- Develop file plans (file plan template and agency-specific file plans)
- Determine document/data security classification levels (Public, Internal Use, Confidential, or Restricted)
- Analyze existing content (paper, email, share drives, other electronic documents) for potential transition to Records Manager, and make recommendations to the agency
- Assess the need for non-standard record types
- Present initial configuration

4. Migration of Content/Systems

- RMS will analyze and make recommendations for efficient migration of existing content (email, shared drives, paper files, etc.) into Records Manager if requested. The agency is responsible for the actual work required for content migration, which may require a separate charter with DTMB-IT and additional resources.
- RMS will analyze and make recommendations for efficient migration of existing imaging or document management systems into Records Manager. The agency is responsible for the actual work required for system migration, which may require a separate charter with DTMB-IT and additional resources.
- RMS will, in consultation with the agency, develop a data map for existing images and metadata, import migrated test images and metadata, and import final data extraction when it is delivered back in the appropriate format from IT/Vendor for production.
- RMS will, in consultation with the agency, develop a temporary transitional business process for daily content uploads.

5. Records Manager Testing, Training and Rollout

- RMS will assist in the modification of standard training manuals in accordance with agency-specific needs, if necessary.
- RMS will provide end user training to Implementation Team.
- Implementation Team will test the draft file plan and configuration settings for issues.
- Implementation Team will develop final configuration for approval.
- Implementation Team will establish go live date.

- Agency IT Support will deploy software to end users, with the assistance of RMS.
- RMS, with the assistance of the Agency Local Coordinator(s), will train the end users.
- Agency Local Coordinator(s) will assist end users with the transition to Records Manager.

6. Production Maintenance
   - Agency Local Coordinator(s) will contact RMS when modification of the configuration is needed.
   - Agency Local Coordinator(s) will work with RMS to implement record disposition.
   - Implementation team will meet periodically (as necessary) to discuss the status of the transition.

G. Critical Success Factors

Cultural change and end user acceptance of Records Manager is critical to the success of this project. Agency champions are necessary to foster an environment of cooperation and open communication.

It is the agency's responsibility to manage change and the advancement of the technological skill levels of agency staff. The identification of, and catering to, end user's level of technological skill may be required.

The agency must prepare its environment during the course of this project for the transition to Records Manager as an official recordkeeping system. Successful migration of existing documents depends on the agency's ability and willingness to pre-organize and de-duplicate its electronic records.

Additional success factors associated with the implementation of Records Manager should be identified by the agency. These success factors could include:

- *Consistently organizing records for retrieval.*
- *Centralizing storage of records, regardless of format, so all records for a business process are stored together.*
- *Easier and faster retrieval of information.*
- *Improved compliance with FOIA timelines.*
- *Easier and more secure sharing of records among employees.*
- *Improved compliance with litigation holds.*
- *Improved redaction of confidential information that is released outside of the agency.*

H. Rates & Billing

Estimated Resource Requirements and Costs

RMS Sponsor: No costs
RMS Analyst(s): No costs
Agency Sponsor: *Cost*

Agency Implementation Leader(s): *Cost*
Agency Assigned Business Analyst(s) (if applicable): *Cost*
Agency Local Coordinator(s): *Cost*
Contracted services/existing enterprise solutions (imaging services, scan capture software, scanning devices, multifunction devices, etc.) (if applicable): *Cost*
PCs and or other equipment (if applicable): *Cost*
DTMB-IT Project Management (if applicable): *Cost*
DTMB-IT resources (if applicable): *Cost*

Rate Structure
The attached Records Manager rate sheet shows costs incurred during the initial implementation phase based on the anticipated purchase date of the initial licenses. The initial number of seats/users is anticipated to be *0.* This initial implementation phase is expected to take *0* months. Costs incurred after the initial implementation will be billed in accordance with the current rates, volumes, and users *20* new users + *0* initial implementation users). See attached estimated yearly rate sheet (Attachment A).

RMS will charge for **Initial Implementation** which is calculated by the number of seats (users).

RMS will charge for maintenance and support services based upon the following rate structure:

- **Maintenance rate** is based on the Annual Maintenance Plan (AMP) of Records Manager licenses per seat of active users, and labor for application maintenance and DTMB-IT support (including software upgrades).
- **Storage and hosting rate** is based on the amount of storage space used by the agency, and an allocation for DTMB-IT hosting services.

Inter-Account Billing
RMS shall inter-account bill appropriate charges monthly, based on the established service rates. Rates will be reviewed and published on an annual basis.

Agency Billing Information
Agency: ##
Index: ##
PCA Code: ##
Comptroller: ##
Agency Object: ##
Financial Contact Person: *Name*

I. Standard Services

Standard services to be provided by RMS include the following:

System Usage

The use of any and all functionality provided within the confines of Records Manager, specifically focusing on the use of Document Management, Image Management, Workflow, Library Services (check-out/check-in, version control, etc.), and Records Management. Other functionality that may be available in Records Manager will be provided at the discretion of RMS, once the functionality has been tested and evaluated. Additional costs and resources may apply.

Analyst Services
RMS will analyze the agency's business functions in order to configure Records Manager in accordance with established application standards. RMS will configure Records Manager with the agency's Retention and Disposal Schedule (including the classification of records), File Plan, Organizational Structure, and Security Model to meet the accessibility needs of the agency.

Training Services
RMS will provide agency-specific training to the implementation team at the onset of the project, and to end users at the onset of the initial implementation. RMS will provide ongoing non-agency-specific training.

Application Support
The Agency Local Coordinator(s) shall provide Level 1 support. Level 1 help desk support may include, but may not be limited to, specific business unit policies, and practices and the functional use of Records Manager.

Level 2 help desk support includes, but may not be limited to, the troubleshooting of functional problems or the identification of technical problems with the software. Level 2 help desk support will be available by calling 517-335-9132. Help desk hours are Monday - Friday, 7:30 am - 4:30 pm (except state holidays). The help desk will attempt to respond to the request for assistance within 1 business day. RMS is responsible for contacting DTMB-IT or HP if additional technical assistance is needed.

Technical Support
Technical Support shall be provided by the various technical support areas of DTMB. RMS will coordinate all technical support as it relates to the core functions of Records Manager including the monitoring and necessary system expansion.

Security/User Authentication Support
RMS will be responsible for establishing all user accounts in the Records Manager system, in accordance with DTMB policies and procedures.

Additional Records Manager Functionality
RMS will evaluate and/or identify additional uses of Records Manager beyond the four core functions. This may include the development of standards, policies, procedures and best practices as they pertain to Record Manager's out-of-the-box functionality.

Additional Document Management Services

RMS will assist agencies with the expansion of Records Manager usage. Additional document management solutions may include additional Records Manager modules, scanning solutions, reporting/auditing solutions, and interfaces to line-of-business applications. RMS will leverage existing DTMB services whenever possible in order to improve efficiencies and lower the overall costs of business operations. Specific requests by an agency for additional services may be subject to additional resources and costs.

J. Maintenance and Support

All ongoing support, including the expansion of the system back-end and software upgrades, will be the responsibility of RMS.

K. Modifications and Change Orders

The Agency Sponsor is responsible for authorizing the purchase of additional user seats. The Agency Local Coordinator(s) is responsible for notifying RMS when users need to be added or removed, and when file plan and/or retention schedule changes are needed.

When an employee at the agency needs a seat, the Agency Local Coordinator(s) will request a Records Manager account set up for the user. If an open seat is not available, a new seat will have to be purchased by the agency. The Agency Sponsor must authorize the purchase of the new seat. The agency will be billed for the seat(s) during the next billing cycle.

If an employee with a Records Manager seat leaves the agency or no longer needs the seat, it must be deactivated. The Agency Local Coordinator(s) will request that the Records Manager seat for the user be deactivated. The agency can choose to hold the seat for future use and continue to pay the maintenance rate, or release it. The Agency Sponsor must authorize the release of a seat.

If the agency requires modifications to the Records Manager configuration before or after implementation (file plans, record types, security, retention schedules, etc.), the Agency Local Coordinator(s) will contact RMS to discuss, develop and plan implementation of the modifications. Routine modifications to the configuration are expected and fall within the scope of maintenance component of this Charter. However, RMS may determine that significant modifications to the configuration are outside of the scope of this Charter and require a new Charter or a Change Order to the existing Charter. Examples could be agency splits and merges or additional business functions.

Selection of a new Agency Sponsor will require a Change Order that must be signed by the new Agency Sponsor and their direct supervisor.

L. Duration and Cancelation

This agreement will be effective the date it is signed below. It will be ongoing and can be reviewed as determined necessary by either party.

Cancelation of Records Manager will require the development of a written migration plan and a decommission charter in order to define a strategy to migrate records and information from Records Manager to another record keeping system. The agency is responsible for notifying RMS to begin the process. RMS will facilitate the development of the decommission charter.

M. Signatories

The signatories warrant that they are authorized to execute this Charter on behalf of their respective departments.

The signatures of the people below relay an understanding in the purpose and content of this document by those signing it. By signing this document you agree to this as the formal authorization to begin work on the project described within, and commitment of the necessary resources.

Good afternoon,

Attached is the Flint Emergency Purchasing Procedures Jeff spoke about this afternoon.

Heather

STATE OF MICHIGAN

RICK SNYDER
GOVERNOR

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership

FROM: DTMB Procurement

SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

DRAFT

2/16/16

TO: All DTMB Custodians of Correspondence Related to Flint FOIA/Discovery Requests

FROM: Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

SUBJECT: Flint FOIA/Discovery Requests – Keywords and Search Guidance

In recent months, ~~T~~the ~~s~~State of Michigan has received a number of Freedom of Information Act and legal discovery~~FOIA~~ requests related to the ~~matter captioned above~~water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these ~~FOIA~~ requests. **As a custodian, you are required to produce any documents containing the ~~keywords~~ search terms listed below, ~~as directed in this memorandum,~~ no later than ~~Thursday, February 25~~Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (*includes emails, calendar items), and OneDrive*

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the keywords listed below.

Shared Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the shared drive search effort for all ~~of~~ DTMB's custodians. Custodians do *not* need to independently conduct a shared drive search for the keywords below.

~~However, *custodians do need to place any documents that may be related to this search in to a shared drive if those documents are currently housed on a hard drive, thumb drive, or other non-shared electronic medium.* More information about that follows.~~

Non-Shared Drives – *includes hard drives, desktop, and thumb/flash drives*

For all non-shared drive types, ***each custodian will need to search every keyword below in every non-shared format, and move all relevant/related documents in to a shared drive for collection.***

Start by conducing the keyword search of all non-shared drives, filling out the attached keyword checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

Formatted: Indent: Left: 0", Hanging: 0.5"

DRAFT

All relevant/responsive items that are produced as a result of your keyword search need to be moved to whatever shared drive you regularly use. To do this, first create a file in the shared drive titled "Flint FOIA" and move all relevant/related documents to that folder. Another custodian may use the same shared drive that you do. A separate "Flint FOIA" folder is not needed for each custodian, multiple custodians may place their files in to the same file. We would ask custodians to add the "Flint FOIA" folder to the shared drive on a first-come basis – if you see a folder there, another custodian has likely added it, and you can begin to place your files there. If you do not see a "Flint FOIA" folder in the shared drive that you regularly use, you are likely the first custodian to start the search. Please add the "Flint FOIA" folder and begin to move your files there. Other custodians will begin to add their items when they begin their search effort.

You can move your relevant/related documents to your shared drive in whatever format the document is currently in. After the 2/25/16 deadline, DTMB staff will access the shared drives and collect all files from the "Flint FOIA" folders.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to the "Flint FOIA" folder on the shared drive that you would regularly use, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned "Flint FOIA" folder on the applicable shared drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

DRAFT

Flint FOIA Search Term Checklist

Various FOIA requests have been received by the State of Michigan, and you have been named as a likely custodian of relevant/responsive items. As a custodian, you are required to search and copy all items that you identify to a DTMB shared drive, as described above.

Please complete your search no later than close of business on Thursday, 2/25/16. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

Search Terms:

- ☐ "Legionnaire"
- ☐ "Legionella"
- ☐ "boil water order" & "Flint"
- ☐ "coli" & "Flint"
- ☐ "bacteria" & "Flint"
- ☐ "microb" & "Flint"
- ☐ "TTHM" & "Flint"
- ☐ "Lead" & "Flint"
- ☐ "emergency" & "Flint"
- ☐ "Karegnondi"
- ☐ "Genesee County Health Department"
- ☐ "Flint" & "utilities"
- ☐ "Lead and Copper Rule"
- ☐ "Detroit Water and Sewerage Department" & "Flint"
- ☐ "DWSD" & "Flint"
- ☐ "Flint River"
- ☐ "Pb" & "water"
- ☐ "KWA"

Search conducted on the email account of: _____

By (your name): _____

Date completed: _____

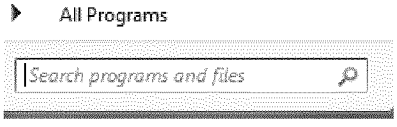
Please return this completed Checklist to Jean Ingersoll by the due date stated above
ingersollj@michigan.gov, or
Directors Office, Cass Building, Second Floor

Comment [GA(1]: The list originally included a note like (anywhere in document). I think this is unnecessary and could lead to confusion if we're asking people to search exactly as listed, so I look that note out. We should check with Valerie/Travis though.

Comment [GA(2]: This was originally written as "Flint" (within sentence) "utilities"

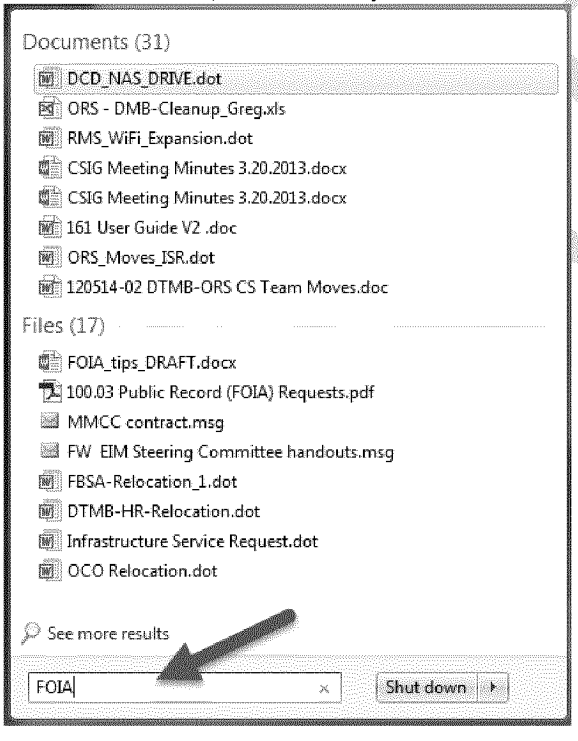
I changed it to "Flint" & "utilities" … I assume that's what they meant, but we should check with Valerie/Travis

DRAFT



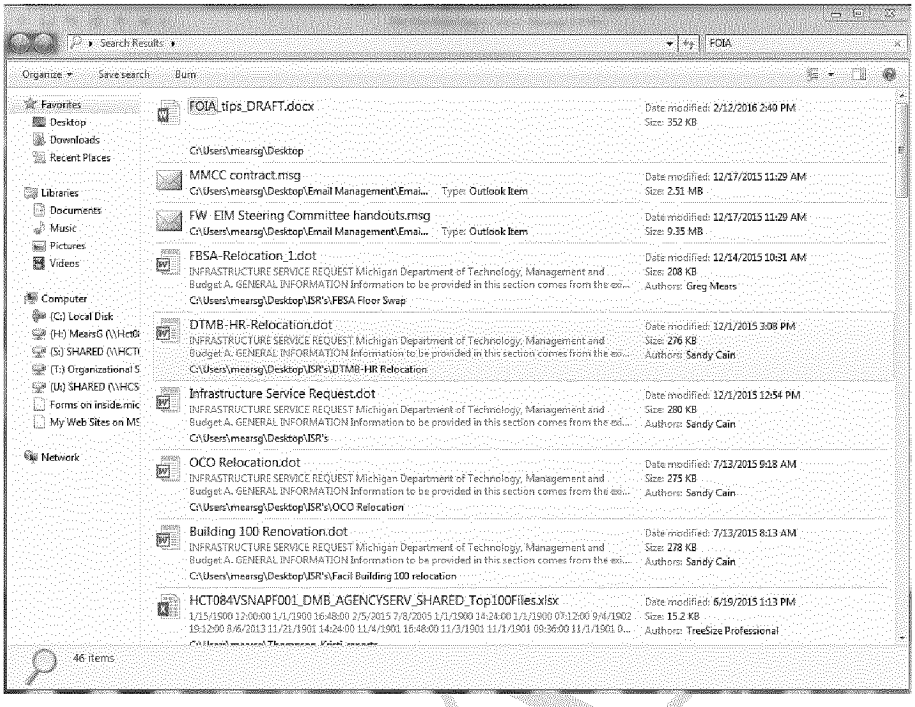
APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer. Before conducting your searches, remember to check the shared drive that you typically use to see if a "Flint FOIA" folder has already been created by another



custodian. If such a folder has not yet been created in the shared drive that you use, please create one.

Using the search function in windows 7



Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form.
You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the "Ctrl-A method", and copy them to the "Flint FOIA" folder on the shared drive that you regularly use.

Facilities and Business Services Administration
2015 Accomplishments

Real Estate Division

- **Lease Savings and Portfolio**
  - In FY 2015, DTMB Real Estate Division has eliminated 10 leased facilities, totaling 159,080 square feet of space. This was accomplished through the maximization of state-owned buildings, moving personnel into other existing leases, and reducing workstations sizes.

- **Real Estate Successful Audit**
  - The DTMB-Real Estate Division (RED) recently underwent an external audit, performed by the Legislature's Office of the Auditor General (OAG). Real Estate was rated as "Effective" the OAG's highest rating. The audit only made only one recommendation, noting only a reportable (minor) condition (of which RED agrees).

- **High-Profile Projects**
  - *MSP Marshall:* Last summer, completed lease and construction of the new Marshal Regional law Enforcement Center. This project collocates the Calhoun County Sheriff's Office, City of Marshall and the Michigan State Police in a regional law enforcement center, combining the three agencies into a single location.
  - *Gaylord Service Center Expansion:* The State once maintained more than 12 State of Michigan leased facilities throughout the City of Gaylord. In 2013 eight were combined into a single building. Last year, the Michigan State Police consolidated an additional three leased locations into the facility, bringing the total consolidation of eleven facilities into one. The center now includes the MSP, DOS, DMVA, LARA and DHHS.
  - *Flint Water Warehousing and Distribution Center:* Assisted the SEOC to locate emergency space to warehouse and distribute water and filters. Assisted DEQ with locating warehousing for water samples.
  - *"Clark Street" DHHS Relocation:* Completed project to relocate DHHS Clark Street office to make way for the Gordie Howe International Bridge.

- **State as Lessor – income year-to-date**
  - 33 State as Landlord Leases totaling $2.6 million in annual rent to the State.

- **Capitol Area Reconfiguration (CAR)**
  - Moved over 1,300 of staff from May 2015 through February, 2016 for CAR and related moves.
  - In seven post-move customer surveys, personnel moving as part of CAR gave DTMB an average 4.59 out of 5 score for move satisfaction.

- **Land Sales**
  - Camp Manistique, DOC Property in Manistique, MI. Private sale for $150,000, exceeding appraised value and allowing for the creation of a new business in the area.

Shaking my head! I bet they wouldn't drink the water, bathe in the water, or even give it to their dogs. Many of the residents are unable to go outside of their community to wash their clothes, so they still use this water for basic living needs, which I'm sure our elected officials wouldn't do. On top of that, they are still paying astronomical water bills for water that is literally killing them! It hurts and my heart goes out to everyone affected!

DTMB Printing Services Monthly Report
January 2016

Current Projects / Initiatives:

- Printing Services completed a rush project for Treasury in less than 4 hours! Treasury contacted us with a request to print 70 copies of a document on light green paper. The order was received at 4:00 p.m. but the specifications were much different! The quantity was still 70, but the paper and bindery requirements had changed. Despite the changes, the job was still able to be completed and delivered before noon! Great teamwork by Printing Services staff to meet our customer needs!
- As a result of the Flint water crisis, Printing Services staff have printed over 1.2 million palm cards and 1 million water testing forms, in English, Spanish and Arabic. These jobs were all quick turnaround – sometimes a matter of hours! Staff stepped up to the challenge! Special thanks to Mark Miller, Todd Martin, Arnie Castillo, Brad Schumann, Shay Cooper, Tina Luna, Scott Barclay, Dan Chipman, Tom Cooley and William Banks for going above and beyond in providing excellent customer service!
- January was a huge "tax" month for Printing Services.
    - Completed development and printing of the annual DTMB OFM 1099 statement. There were a total of 58,521 images printed.
    - Completed development and printing of the annual DTMB OFM W2 statement. There were a total of 61,208 images printed.
    - Completed development and printing of the annual MDHHS W2 statement. There were a total of 64,118 images printed.
    - CPC successfully completed the MDHHS CHAMPS 1095B printing project. There were a total of 279 print files, each file consisting of 40,000 images. The entire project resulted in 11,160,000 printed images.
    - Completed development and printing of the annual MSHDA 1099 statement. There were a total of 11,052 images printed.
    - Completed development and printing of the annual MSHDA 1099G statement. There were a total of 682 images printed.
    - Completed development and printing of the annual ORS 1099 statement. There were a total of 286,576 images printed.
- CPC finalized our responses to the findings from the August IRS Safeguarding Audit. The outstanding issue with Xerox on a security patch for the IRS overlay on the Nuvera controllers has been resolved. Printing Services is now 100% responsive and compliant with its IRS findings.
- Printing services was contacted by DTMB Building Operations who were need of an emergency sign for their GOB construction site. Electrical inspectors had threatened to shut down their construction if an electrical sign wasn't installed. Molly Perry was able to produce a sign for them within a few hours, which allowed Building Operations to continue to work! Great job, Molly!

- The Pace implementation is on-going. EFI will be on-site the week of February 1 to implement the Fiery Central (which will allow our Xerox printers to communicate with Pace) and the update to our online ordering system.
- DTMB Office of Performance Management graciously allowed Printing Services consultants to occupy a vacant office in their area in Constitution Hall. We moved into that space on January 20th. It is on the 1st floor of Constitution Hall in the northwest tower.
- Printing Services completed the quarterly Voya printing. The statements consisted of over 1.1 million images. In addition, newsletters, seminar schedules and performance numbers were produced as well. This quarter's printing also included the MPSERS Pension Plus and DC statements and inserts, which are completed twice a year.

Kudos:

  Subject: RE: SOTS Materials-- Program

  Hi Jerry,

  I think we might be all set and not need any additional copies printed of new materials. I won't be here tomorrow so I'm cc'ing Jean Hall from our office. If this changes, Jean will be the one to reach out to you. However, we do not expect to have any additional needs.

  Again, thank you so much for your help this year! As always you have been amazing to work with and the service you provide is exceptional!

  Thanks,
  Claire Khouri

  Subject: Print Jobs 111860 and 111693

  Good Afternoon Mark,

  I just wanted to thank DTMB Print and Graphic for our two latest print jobs, 111860 for two large posters, and 111693 for a tri-fold brochure. I just got these today and I only ordered them last week.

  On the brochure, I worked with Scott. He spoke to him on the phone and he brought the proof for me to approve. He was very helpful. The brochure looks great and my staff, especially the author, is very happy.

  The posters are for our lab windows and they look great, also.

  Both jobs were created on the website, which is becoming easier and easier for me to maneuver through. Print and Graphics staff called me for clarification on exactly what I wanted and were patient with my questions, answering them thoroughly. You do good work and I wanted to let you know how much I appreciate it!

  Kit

Dear Resident,

From previous contact with the Flint Water Response Team, you have been identified as a home that indicated you would be willing to participate in follow up sampling and monitoring of your water quality.

We stopped by today to discuss additional sampling, check your plumbing and coordinate with you on sampling protocols.

If you would still like to participate, and we hope you do, please call the Environmental Assistance Center at 1-800-662-9278 and we will find a time that works for you to have us stop back at your home.

Thank you,
Michigan Department of Environmental Quality

Samples must be received in the laboratory within 14 days of collection.

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in your drinking water.

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

1. **The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**

2. **Select a cold water faucet** in the **KITCHEN** or **BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? Date _____ TIME _____ AM/PM

Is there a faucet-mount filter? __ YES ___ NO If YES, was it bypassed? ___ YES ___ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ____YES ____ NO

If YES, please describe: _____

If YES, was it bypassed? _____ YES _____ NO

3. Open sample bottle and place below the faucet and gently open the **COLD** water tap. If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.

4. Tightly cap the sample bottle

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: _____

5. Fill out the collection information on the front, answer the questions above and sign the form.

6. Attach this form to the bottle and return it to either **Flint City Hall or the Flint Water Plant**.

7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.

If you have any questions contact:

City of Flint Water Plant 4500 N. Dort Hwy. Phone: 810-787-6537 ext. 3501

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Keeping Your Home Lead-Safe

Clean Your Aerators

What can you do to keep your home lead-safe?

Homes built before 1987 are more likely to have lead service lines and pipes. Some faucets and certain kinds of solder could also have lead in them, even those installed recently.

The lead found in tap water in homes around Michigan is likely from these older pipes, solder, and faucets. You can have your water tested to see if it has lead in it.

Replacing old pipes, service lines, and faucets is the best way to limit the lead in your tap water. New pipes, solder, and faucets should meet EPA lead-free standards.

If you can't replace your pipes and faucets, please use an NSF-approved filter for all water that you drink or cook with. You can get a filter that attaches to your sink faucet or you can use a pitcher with a filter inside it. If you live in Flint, call 211 to find out where you can get a free faucet filter, replacement filter cartridges, or a water filter pitcher.

For bathrooms or other places where you don't have a filter:

When pipes are old, they break apart more easily. Sometimes pipes break completely; sometimes they just get new cracks. This can cause bits of lead pipe to end up in our home's water. There are screens - called aerators - on our faucets that sometimes stop the larger pieces from coming out. Aerators do help us save water - so it's good to have them - but cleaning them once in awhile is a way to limit the lead that could end up in your water.

Follow the steps below to learn how to clean your aerators:

The little round thing on the bottom of your faucet is the aerator (pronounced: air-raytor).

Unscrew the aerator from the bottom of the faucet.

You should be able to unscrew it with your fingers, but you might need a wrench if it's really stuck.

Your aerator might not look exactly the same as this, but it's OK.

Now that you have it off, let's get started!

While you really only need to use water to rinse off your aerator parts,

if you have these things around, they might make it easier:

An old toothbrush

A glass of vinegar

Soaking the aerator in vinegar will help loosen up some of the grime.

You can leave it in as long as you want, but even just 5 minutes will help.

The toothbrush makes it easy to scrub out the inside. Just don't use that toothbrush for brushing your teeth again!

If your aerator looks like Photo A, it has a flow control piece in it. You'll have to take it apart:

Pull out the pieces carefully.

Note the order that the pieces come out. Take a picture or write down some notes. You'll have to put them back in at the end in the same way!

If it looks like Photo B, then you're good to go to Step 6.

You might not have all of these pieces. They might not be this color. Every aerator is a little different. Just clean what you have.

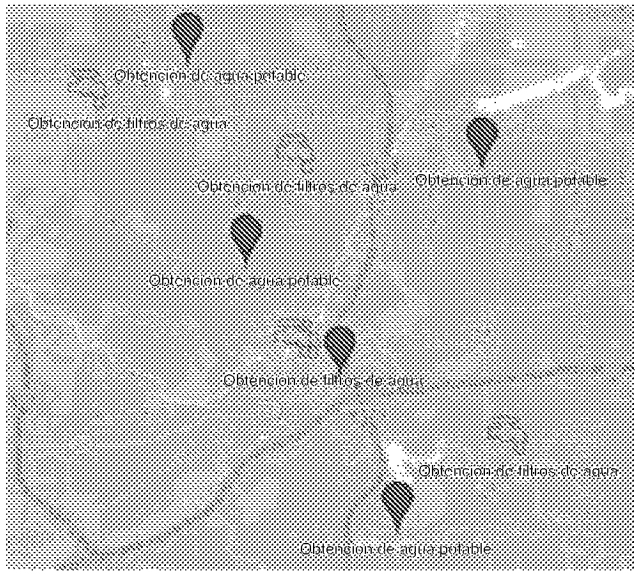
Scrub all of the pieces. Make sure you really get down inside the metal piece, removing any bits of grime or metal flakes you can see.

Rinse everything very well.

Run the water through the aerator screen - holding it right side up and upside down.

Once it's clean,

If your aerator looks like Photo A up above, put it back together.



If it looks like Photo B, you're all set.

Put your aerator back on your faucet.

Repeat these steps every couple of weeks. This will make sure pieces of lead and other metal from any pipes aren't getting stuck in your faucet and possibly putting lead into your water.

Questions? For more information call MDHHS at 1-800-648-6942.

Llame a United Way 2-1-1 para plantear sus dudas, hacer donaciones u ofrecerse como voluntario.

TOMANDO MEDIDAS
AGUA DE FLINT

USE AGUA DEL GRIFO FILTRADA

- Para beber y cocinar
- Para lavar frutas y verduras
- Para cepillarse los dientes
- Para las cubas de agua de las mascotas

USE AGUA DEL GRIFO SIN FILTRAR

- Para limpiar
- Para bañarse

PRUEBA DE NIVEL DE PLOMO EN SANGRE

Todos los niños de Flint menores de seis años deben hacerse el examen de nivel de plomo en sangre. Contáctese con su médico de cabecera o llame al 2-1-1.

NUTRICIÓN

¿Sabía que algunos alimentos ayudan a que el plomo no se almacene en el cuerpo de los niños? Consuma alimentos ricos en calcio, vitamina C y hierro.

PRUEBA DE AGUA GRATUITA

Los residentes de Flint que tengan dudas acerca del agua pueden obtener equipos gratuitos de pruebas de agua en los sitios de recursos hídricos.

USE FILTROS DE AGUA Y CARTUCHOS FILTRANTES

Los filtros de agua pueden reducir el nivel de plomo y de otros contaminantes en un 99 por ciento si se instalan correctamente. Los sitios de recursos hídricos ofrecen filtros de agua gratuitos.

PARA AYUDA INMEDIATA

LLAME AL 2-1-1

Muestreos y pruebas de seguimiento

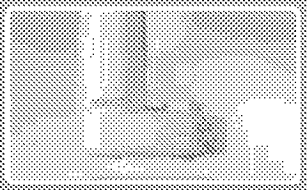
Los hogares seleccionados como puntos de muestreo serán visitados por un miembro del equipo de muestreo, un plomero certificado y personal adicional. El miembro del equipo de muestreo explicará el motivo de la visita y los pasos subsiguientes. El plomero hará una evaluación básica de las cañerías de la casa. El miembro del equipo de muestreo mostrará a los residentes cómo limpiar sus aireadores y cómo hacer otras pruebas de agua en forma particular.

Los resultados de las pruebas de laboratorio se publican diariamente en internet en: www.michigan.gov/flintwater.

Los resultados de las pruebas se enviarán a los residentes por el correo postal de Estados Unidos.

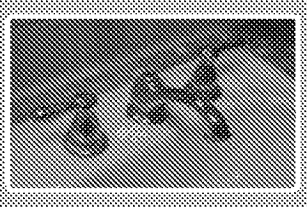
Si los resultados de las pruebas de su casa son mayores a 150 partes por mil millones (ppb), se le hará una visita dentro de las 48 horas siguientes.

Dentro de 48 horas después de cualquier prueba que muestre más de 150 ppb, se realizará una visita. Esta visita de cuidado de la salud en el hogar incluye:



1) Información sobre bienestar y salud
2) Derivación para un análisis de sangre
3) Evaluación de las necesidades de transporte para concurrir a las citas.
4) Provisión adicional de agua embotellada, filtros de agua y equipos de muestreo.

Si los resultados de las pruebas de su casa son mayores a 100 ppb, pero menores a 150 ppb, se le hará una visita dentro del lapso de siete días.



Puede ver videos instructivos sobre la sustitución de filtros y las pruebas de agua en www.michigan.gov/flintwater en la pestaña Centro de Medios.

Algunas medidas que puede tomar:

Instale un filtro certificado por la NSF y repóngalo de acuerdo a las pautas del fabricante. Puede obtener los filtros en forma gratuita.

Reemplace los grifos antiguos y los elementos que contengan componentes de plomo.

Limpie los aireadores en forma periódica para eliminar las partículas contaminantes.

Envíe muestras del agua de su hogar para que sean analizadas.

¡Hervir el agua NO elimina el plomo!

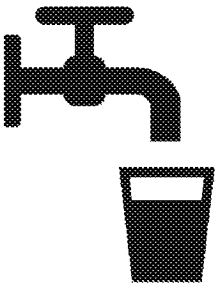
Genesee County Health Department

Frequently Asked Questions About Lead in Flint Water

MDHHS Michigan Department of Health & Human Services

- Lead is hard to avoid completely. It can be found in old paint, water pipes and brass water faucets, in dirt, at some job sites, and in metal used for some hobbies.
- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - Even small amounts of lead can harm kids' health because they are little and still growing.
  - Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a NSF-approved filter.
  - Find a NSF-approved filter at http://www.gchd.us/docs/lead_filter_information.pdf.
  - If you use City of Flint water, you can call 211 to find out where you can pick up a free water filter.
- Some filters can remove up to 99% of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - Change the filter cartridge as often as you should.
  - Run only cold water through the filter.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop. Use the tips below to know when it's best to use filtered water:



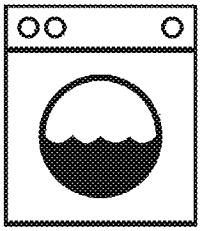
Lead in Water

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- **You can't see, smell, or taste lead in water.**
- **Lead won't change the color of your water.**
- **The only way to know what your home's lead levels are is by having your water tested in a lab.**

Please call the Flint Water Department at 810-787-6537 to request a free or low-cost water test.

In The Kitchen



Use filtered tap water for:

- Drinking (including making coffee, drink mixes, juice, baby formula)
- Cooking (even if you boil the water, the lead will stay in the water and food)
- Washing fruits and vegetables

You can use unfiltered tap water for:

- Washing your hands
- Washing dishes
- Wiping down countertops

Cleaning

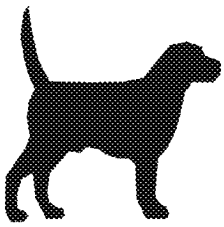
You can use unfiltered tap water for:

- Mopping floors
- Washing clothes

Your washing machine and dryer won't put lead from the water into the air of your home.

In the Bathroom

Use <u>filtered</u> tap water for:



- Brushing kids' teeth

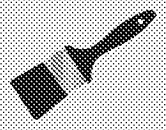
You can use <u>unfiltered</u> tap water for:

- Showers
- Baths (don't let kids drink the water as they play in the tub)
- Brushing your teeth (if you are an adult)

Lead will not cause rashes or other skin problems. However, if chlorine levels or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

Caring for Pets

Use <u>filtered</u> tap water for:



- Pets' water bowls

You can use <u>unfiltered</u> tap water for:

- Baths

If you notice your pet acting differently than normal, please contact your vet.

Other Sources of Lead in Your Home

Lead Paint

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

Dirt

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

Dust

- The dust in your home can contain tiny amounts of both the paint and the dirt that contain lead.

Hobbies & Jobs

- Solder, fishing sinkers, bullets, and stained glass framing materials are some of the items in your home that may contain lead. You could also track home lead dust from your job site.

Have Questions?

For more information about protecting yourself and your family from lead, please visit:

<u>www.michigan.gov/lead</u>

Or you can call the Michigan Department of Health and Human Services at:

1-800-648-6942

The staff at this number will help direct you to the best department that can answer your questions about lead in your home.

To request a free or low-cost water test, please call the Flint Water Department at:

1-810-787-6537

To find out if you can get a free water filter, please call 211.

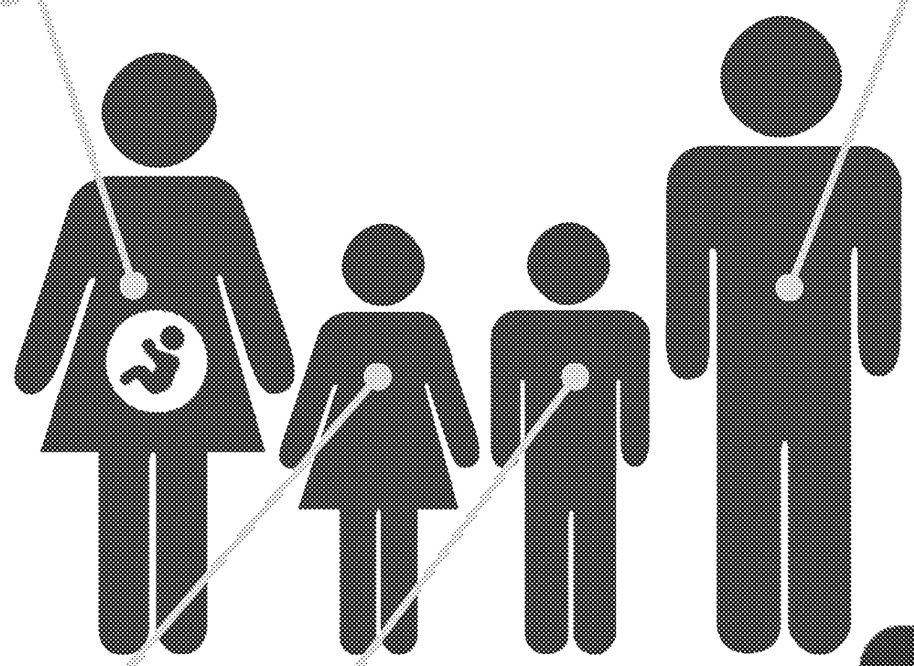
Frequently Asked Questions About Lead & Your Body

MDHHS Michigan Department of Health & Human Services

Pregnant Woman

If you are exposed to lead when pregnant, the lead can be passed on to your fetus, possibly causing:



- premature birth
- a smaller baby
- learning difficulties
- slower growth in young kids

Healthy Adult

You are at lower risk of health problems from small amounts of lead.

Most health problems that come from lead in adults are because they are exposed to a lot of it at their job - whether they are in painting or construction or work at a factory where lead is used in a product.

If you work with lead, you should have regular blood tests to make sure you're not getting too much into your body.

Kids

Even small amounts of lead can harm kids' health. Your doctor can do a simple blood test to find out if your child has been exposed to lead. Some possible signs of lead poisoning include:

- a bad stomachache
- muscle weakness
- paleness (caused by anemia)

Over time lead can affect a kid's

- brain development
- growth rate

How Does Lead Get Into Your Body?

Eating and breathing lead dust is the most common way lead gets into your body.

- When kids accidentally eat lead, up to 50% can be absorbed into their bodies, compared to 3 to 10% for adults. This is why protecting kids from even small amounts of lead is important.

Lead does not absorb into your skin quickly or at high levels.

- The CDC reviewed a study where a cream with high levels of lead was put on the skin of adults. The cream was left on their skin for 12 hours. The amount of lead that soaked into their skin was very, very small (less than 0.3 percent).
- Taking a shower or bath in water containing lead at levels found in most tap water in Michigan is unlikely to be a problem for anyone, including kids.

If you think you or your children have been exposed to lead, please talk to your doctor or health department about getting a simple blood test to measure how much lead might be in your body.

For more information on protecting yourself and your family from lead, please visit: www.michigan.gov/lead, or you can call the Michigan Department of Health and Human Services at 1-800-648-6942. We will help direct you to the best department that can answer your questions about lead in your home.

You can also call the Flint Water Department at 810-787-6537 to request a free or low-cost water test.
If you use City of Flint water, you can call 211 to find out where you can pick up a free NSF-approved water filter.

Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
Filtre el agua potable utilizando un filtro aprobado por la National Sanitation Foundation (NSF).

Call 2-1-1 to find out where you can pick up a free water filter.
Llame al 2-1-1 para averiguar adónde puede retirar un filtro de agua gratuito.

Some filters can remove up to 99 percent of the lead in water when used properly.
Algunos filtros pueden eliminar hasta el 99% del plomo en el agua cuando se utilizan correctamente.

To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
Para asegurarse de que su filtro está eliminando la mayor cantidad de plomo posible, siga cuidadosamente las instrucciones enviadas con éste.

Run only cold water through the filter.
Deje correr agua fría a través del filtro solamente.

Change the filter cartridge as often as the instructions say.
Cambie el cartucho del filtro tan a menudo como lo indiquen las instrucciones.

Even after changes to the water system, it may take a while before lead levels in your home's water drop.
Incluso después de los cambios en el sistema de agua, puede tomar un tiempo antes de que los niveles de plomo en el agua se reduzcan.

Although your water may be a different color sometimes, it is not caused by lead.
Aunque el agua a veces puede ser de un color diferente, esto no es causado por el plomo.

Lead won't change the color of your water.
El plomo no cambiará el color del agua.

The only way to know what your home's lead levels are is by having your water tested.
La única manera de saber cuáles son los niveles de plomo en su hogar es haciendo examinar el agua.

LEAD IN BLOOD
PLOMO EN LA SANGRE

If your children live in Flint or go to school or childcare in the City of Flint, their blood-lead level should be tested.
Si sus hijos viven en Flint o van a la escuela o a una guardería en la ciudad de Flint, sus niveles de plomo en la sangra deben ser examinados.

You should contact your doctor about testing.
Debe comunicarse con su médico para realizarse un examen.

Testing is available for free at the Genesee County Health Department.
El examen está disponible de forma gratuita en el Departamento de Salud del Condado de Genesee.

If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

Si está embarazada o amamantando y ha dado positive en los niveles altos de plomo en la sangre, hable con su médico acerca de la seguridad de la lactancia materna.

Get your water tested.
Haga examinar el agua de su casa.

Call 2-1-1 for a free filter.
Llame al 2-1-1 para solicitar un filtro gratuito.

To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.
Para ahorrar tiempo y agua en el futuro, es una buena idea llenar tantos envases como sea posible, una vez que haya dejado correr el agua durante cinco minutos.

Drain and flush your water heather tanks regularly to remove any lead that has accumulated.
Drene y purgue los tanques de su calentador de agua regularmente, para eliminar cualquier plomo que haya quedado acumulado.

Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
Lave platos, botellas y juguetes con agua no filtrada y jabón y deje que se sequen antes de su uso.

It is safe to use unfiltered tap water to mop floors and wipe down countertops.
Es seguro usar el agua del grifo sin filtrar para limpiar pisos y mesadas.

Take your shoes off when indoors.
Quítese los zapatos cuando esté dentro.

Vacuuming carpets may pull more lead dust to the surface.
Aspirar alfombras puede levantar más polvo de plomo sobre la superficie.

Use a non-motorized sweeper to clean carpets.
Utilice una barredora no motorizada para limpiar alfombras.

Clean windowsills and play areas often with paper towels and soapy water.
Limpie alféizares y áreas de juego a menudo con toallas de papel y agua con jabón.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD
CONSEJOS PARA MANTENER SU HOGAR PROTEGIDO DEL PLOMO

Adults can use unfiltered tap water to brush their teeth.
Los adultos pueden usar el agua del grifo sin filtrar para lavarse los dientes.

You can use unfiltered tap water to shower or bathe, but don't let kids drink the water when they play in the tub.
Se puede utilizar agua del grifo sin filtrar para bañarse, pero no deje que los niños beban el agua cuando jueguen en la bañera.

Studies done by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub...
Estudios realizados por los Centros de Control y Prevención de Enfermedades muestran que los padres pueden seguir bañando a sus hijos en la bañera...

However, if levels of chlorine or other cleaners are high in the water...
Sin embargo, si los niveles de cloro u otros productos de limpieza son altos en el agua...

Agregado de Fosfato al Agua de Flint

¿Por qué hay plomo en el agua de algunos hogares?

- Las tuberías, soldaduras y grifos de plomo solían ser de uso común. Ahora sabemos que el plomo puede dañar nuestra salud.
- Es muy probable que en las casas construidas antes del año 1987 haya tuberías de desagüe y tuberías de suministro de plomo. Algunos grifos y ciertos tipos de soldaduras también podrían tener plomo, incluso aquellos instalados recientemente.
- Es probable que el plomo encontrado en el agua de los grifos de los hogares de Michigan provenga de tuberías antiguas, soldaduras y grifos.
- El reemplazo de tuberías de suministro antiguas, tuberías de desagüe y grifos es la única forma segura de limitar el plomo en el grifo de agua.
- Las tuberías, soldaduras y grifos nuevos deben cumplir con los estándares de producto libre de plomo de EPA.

¿Por qué estamos colocando fosfato en el agua?

- Durante años, los minerales de nuestra agua se acumularon dentro de nuestras tuberías de agua.
- Esta acumulación de minerales se llama sarro.
- Este sarro ayuda a mantener una gran cantidad de plomo, en las tuberías, fuera del agua.
- Si algo le sucede al sarro y el agua puede tocar las tuberías, el plomo se puede introducir en el agua.
- Agregar fosfato al agua ayuda a formar y mantener sarro, recolectándose en los costados de las tuberías y adhiriéndose al metal.

Pista sobre el Fosfato

- El fósforo es un mineral natural que el cuerpo necesita. Funciona con calcio para mantener los huesos fuertes y sanos.
- El fosfato es un tipo de sal que contiene fósforo.
- Aunque el agua potable de Detroit ya cuenta con fosfato, se está agregando una cantidad adicional al agua de la Ciudad de Flint para ayudar a agregar sarro en las tuberías.
- La Ciudad de Flint, MDEQ, y EPA trabajaron juntos para averiguar cuánto fosfato adicional es necesario en el agua que llega a los hogares de Flint.

- La mayoría de las personas probablemente ya comen y beben más fosfato en sus comidas diarias que la pequeña cantidad que se encontrará en el agua del grifo.
- Continúe usando filtros de agua que eliminen el plomo, hasta que se retire la Declaración de Emergencia de Salud Pública del Genesee County Health Department.

¿Qué es el ácido fosfórico?

Aunque el agua que viene de Detroit ya posee una cantidad de fosfato, las plantas de Flint agregarán más para ayudar a acumular y mantener el sarro con mayor rapidez. Para obtener el fosfato necesario para que esto funcione, la Planta Potabilizadora de Agua de la Ciudad de Flint agregará algo llamado ácido fosfórico en el agua de la ciudad. El ácido fosfórico es un ingrediente alimenticio común en productos como cola o jugo.

El ácido fosfórico se disolverá rápidamente en el agua y se dividirá en dos partes, hidrógeno y fosfato. El hidrógeno se convertirá en parte del agua y el fosfato restante se asentará y adherirá a las paredes de las tuberías – acumulando sarro como en la imagen anterior.

Ante cualquier duda sobre el fosfato agregado en la Ciudad de Flint, comuníquese a la City of Flint Water Plant (Planta Potabilizadora de Agua de la Ciudad de Flint) al 810-787-6537.
Ante cualquier duda sobre el fosfato y su salud, comuníquese con el MDHHS al 1-800-648-6942.

Atención: Establecimientos de comidas que utilizan el suministro de agua de la Ciudad de Flint

Estimado Operador del Establecimiento de Comidas:

El 5 de octubre de 2015 le fue enviado un documento recomendando acciones a seguir para evitar el riesgo de servir a sus clientes agua contaminada con plomo. Efectivizado inmediatamente, las recomendaciones se convirtieron en un requisito legal, y esta medida ejecutiva de licencias para establecimientos de comidas podrá ser aplicada si se encuentra que no se cumplió, hasta que la declaración de emergencia de salud pública sea anulada.

Lea la ficha de requisitos actualizada que se encuentra adjunta. Es posible que su establecimiento deba tomar medidas inmediatas para cumplir con este requisito.

Su establecimiento cuenta con tres opciones:

1. Demostrar que su establecimiento no está usando el suministro de agua de la Ciudad de Flint para beber, procesar o cocinar.
2. Demostrar que su agua fue examinada y es de uso seguro. Puede solicitar un examen gratuito a un oficial de regulación. Para programar una recolección y análisis gratuito del nivel de plomo en el agua de su establecimiento, comuníquese al 1-800-292-3939, de lunes a viernes, e informe que posee un “establecimiento de comidas en Flint que solicita un examen del agua”. Prepárese para brindar un tiempo para las muestras luego de que todo el sistema de agua no haya sido usado durante por lo menos 6 horas. Las citas para las muestras están disponibles entre las 5 AM y las 4 PM. Las oficinas estatales estarán cerradas el 18 de enero de 2016.
3. Instale filtros de agua según sea necesario, y deje correr agua diariamente en aquellos grifos sin filtros y equipos de plomería pesada. (El uso discontinuo, dejar correr el agua, etc. aún será necesario hasta que se obtenga una prueba segura del agua).

Los inspectores del Michigan Department of Agriculture and Rural Development le están brindando asistencia al Genesee County Health Department para la conducción de muestras e inspecciones, de modo que es posible que usted deba trabajar con otra persona en lugar de su inspector de seguridad alimentaria habitual. Los inspectores también realizarán visitas a establecimientos en las próximas semanas, para brindar asistencia y verificar el cumplimiento de las medidas.

Para acceder a información adicional, comuníquese al 1-800-292-3939, o para acceder a la información más reciente sobre las respuestas en relación al agua de Flint, visite www.michigan.gov/flintwater. Esperamos poder ayudarle de cualquier forma posible.

Atentamente,

Kevin Besey, Director
Food and Dairy Division
(División de Alimentos y Lácteos)
Michigan Department of Agriculture and Rural Development

27 de octubre de 2015

Estimado Padre,

Como ayuda para asegurar que los niños de Flint estén protegidos de la exposición al plomo, El Genesee County Health Department y el Michigan Department of Health and Human Services le brindan respuestas a las siguientes preguntas:

- ¿De dónde viene el plomo?
- ¿Qué puedo hacer para proteger a mi familia?
- ¿Debo hacer que mi hijo sea examinado?
- ¿Adónde puedo encontrar más información sobre el plomo?

¿De dónde viene el plomo?

Fueron encontrados niveles elevados de plomo en el agua potable de tuberías de plomo en la Ciudad de Flint. Los niños también pueden estar expuestos al plomo de pintura vieja, tierra, cerámica, cosméticos y juguetes y algunos remedios caseros. Los trabajos y pasatiempos de los adultos tales como reparación del auto, vitrales, fabricación de joyas y manejo de municiones también pueden poner a los niños en riesgo, si tocan prendas o juegan en áreas donde hay plomo. El plomo presenta un riesgo grave para la salud, especialmente en los niños pequeños quienes se envenenan al comer, beber o respirar plomo.

¿Se le debe hacer a mi hijo un examen de plomo en la sangre? Los niños que viven en la Ciudad de Flint, que viven en un hogar donde se usa agua de la Ciudad de Flint, o que asisten a la escuela, reciben cuidado de niños o con frecuencia pasan tiempo con un cuidador en la Ciudad de Flint deberán acceder a un examen de envenenamiento con plomo.
Esto se deberá realizar lo antes posible.

¿Adónde debo ir para que se le haga un examen de plomo en la sangre a mi hijo?

El mejor lugar para realizar el examen de plomo en la sangre a su hijo es el consultorio de su médico. Los exámenes son cubiertos por la mayoría de los planes de salud. Su médico hará con usted el seguimiento de los exámenes médicos y le brindará información sobre qué hacer a continuación. Su hijo también puede acceder a un examen de plomo gratuito en el Genesee County Health Department. Si necesita transporte, comuníquese al 2-1-1 para solicitar ayuda.

Entendiendo el resultado del examen de plomo de su hijo.

Un nivel de plomo debajo de 5 significa que hay poco plomo en la sangre de su hijo. Use los siguientes consejos para ayudar a que su hijo se mantenga seguro. Su medico podrá sugerir un nuevo examen para su hijo dentro de los siguientes 12 meses, para asegurar que el nivel no haya subido.

Un nivel de plomo de 5 a 44 significa que su hijo tuvo cierta exposición al plomo. Trabaje con su medico y con el departamento de salud local para acceder a mayor orientación sobre cómo limitar su exposición al plomo. Su médico podrá volver a examinar a su hijo entre 1 y 3 meses después, para asegurar que el nivel no haya subido.

Los niños con niveles de plomo muy altos **(más de 44)** podrán requerir un tratamiento en el hospital.

¿Qué puedo hacer para mantener segura a mi familia?

Se deberán seguir estos pasos de inmediato para protegerse usted y a su hijo.

Cómo proteger a su familia del plomo en el agua:

- Solicite un examen de plomo en su agua. Es gratuito. Para más información, comuníquese al (810) 787-6537.
- Use un filtro de agua en su hogar. Llame al 2-1-1 para acceder a información sobre filtros de agua gratuitos Certificados por NSF.
- Sólo deje correr agua fría a través del filtro.
- Si no cuenta con un filtro de agua, consuma agua de botella o fórmula mezclada.
- Use agua filtrada o agua en botella para beber (incluyendo la preparación de café, mezclas de bebidas, jugo y formula de bebé), y la cocina (incluso aunque hierva el agua, el plomo permanecerá en el agua y la comida).
- Usted puede usar agua del grifo no filtrada para lavarse las manos y lavar los platos.
- Si deberá usar agua no filtrada para beber o cocinar, deje correr agua por el grifo durante cinco minutos antes de usar la misma.

Limpieza segura:

Una limpieza segura es importante. Mantener su casa limpia y segura de riesgos de plomo le ayudará a proteger a su familia.

- Es posible que las edificaciones construidas antes de 1978 posean pintura con plomo. Use toallas de papel húmedas para limpiar pedazos de pintura y polvo en estas edificaciones antiguas. Asegúrese de limpiar alrededor de las ventanas, áreas de juegos y pisos.
- Lávese las manos y lave los juguetes de forma frecuente con agua y jabón.
- Puede usar agua del grifo no filtrada para limpiar mesadas, fregar pisos y lavar ropa.

Buena nutrición:

Algunas comidas le ayudarán a evitar que el plomo se acumule en el cuerpo de un niño. Éstas son comidas con gran cantidad de calcio, hierro y vitamina C. Estas comidas incluyen:

Comidas Ricas en Calcio	**Comidas Ricas en Hierro**	**Comidas con Vitamina C**
➢ Leche	➢ Habas	➢ Naranjas
➢ Queso	➢ Carnes magras como pescado y pollo	➢ Jugo de naranja
➢ Yogurt	➢ Cereales integrales	➢ Pomelos
➢ Tofu	➢ Mantequilla de maní	➢ Tomates
➢ Espinaca		➢ Pimienta verde

Siempre lave la fruta con agua filtrada. Si está preocupado por la dieta de su hijo, hable con su médico, quien le podrá recomendar un multivitamínico diario.

WIC y SNAP brindan asistencia a los padres y niños que necesitan comidas frescas y saludables. Para más información, comuníquese a la **oficina del WIC del Condado de Genesee al (810) 237-4537**. SNAP también ofrece un programa de Double Bucks para adquirir incluso comidas más saludables sin costo adicional.

¿Adónde puedo encontrar más información sobre el plomo?

- Genesee County Health Department Lead Program
  (810) 257-3833
  www.gchd.us

- Michigan Department of Health and Human Services
  Childhood Lead Poisoning Prevention Program
  (Programa de Prevención del Envenenamiento Infantil con Plomo)

  www.michigan.gov/lead

- United States Environmental Protection Agency
  www.epa.gov/lead

- U.S. Centers for Disease Control and Prevention (CDC) Sitio web
  www.cdc.gov/nceh/lead

Estas recomendaciones tendrán efecto hasta que el Genesee County Health Department levante las restricciones sobre el uso del agua.

Atentamente,

Eden V. Wells, MD, MPH, FACPM
Director Médico Ejecutivo
Michigan Department of Health and Human Services

Gary K. Johnson, MD, MPH
Director Médico
Genesee County Health Department

30 de octubre de 2015

Estimado Proveedor:

Como posiblemente ya sepa por los informes de noticias recientes, altos niveles de plomo fueron encontrados en tuberías de plomo dentro del sistema de agua de la Ciudad de Flint.

Para ayudar a proteger a los niños de Flint del nivel de plomo actual en la exposición al agua, el Genesee County Health Department y el Michigan Department of Health and Human Services se están comunicando con usted para brindarle orientación y apoyo a sus familias.

Los niños pueden estar expuestos al plomo del agua potable que circula a través de las tuberías de plomo, plomo de pintura vieja, tierra, cerámica, cosméticos y juguetes y algunos remedios caseros. Los trabajos y pasatiempos de los adultos tales como reparación del auto, vitrales, fabricación de joyas y manejo de municiones también pueden poner a los niños en riesgo, si tocan prendas o juegan en áreas donde hay plomo.

Como proveedor principal de cuidado, usted cumple un rol crítico de ayuda para asegurar que sus hijos y familias expuestas al plomo reciban el cuidado y las garantías necesarias para manejar los posibles impactos sobre la salud por envenenamiento con plomo.

Identificación. Los niños que sufren envenenamiento con plomo con frecuencia no presentan síntomas externos. Sin embargo, síntomas clínicos tempranos pueden incluir anemia, anorexia, dolor abdominal y constipación. El plomo es una neurotoxina y la exposición a éste puede provocar conductas violentas y agresivas, llevar a desórdenes en el aprendizaje, causar Trastorno con Déficit de Atención por Hiperactividad (ADHD, según sus siglas en inglés) y se sabe que reduce el coeficiente intelectual entre 5 y 8 puntos con niveles tan bajos con 10 ug/dL. El plomo es metabolizado a través del sistema gastrointestinal de forma similar al hierro y el calcio, con un promedio de absorción que depende del tipo y peso del niño. La vida media del plomo en la sangre es corta (aproximadamente 1 mes), pero la vida media en el hueso se puede extender por décadas.

Debido a múltiples factores de riesgo que enfrentan muchos residentes de la Ciudad de Flint (incluyendo problemas en casas antiguas y la calidad del agua), recomendamos que todos los niños menores de 6 años que viven en la Ciudad de Flint, o en hogares que usen agua de Flint, que asisten a la escuela o reciben cuidado de niños de Flint, o que pasen tiempo con un cuidador en la Ciudad de Flint, accedan a un examen de plomo en la sangre. El examen de plomo en la sangre debe ser realizado a través del médico de cabecera, para asegurar un seguimiento adecuado al corto o largo plazo. ***Se deberá alentar a las familias para que sus hijos sean examinados de inmediato, ya sea en los consultorios médicos o en el Genesee County Health Department.***

Manejo de los Niveles de Plomo en la Sangre. Se brinda la siguiente guía para el manejo de los niveles de plomo en la sangre de los niños:

- **BLL < 5 ug/dL**
  - Un nivel de plomo inferior a 5 mcg/dL no es típicamente una causa de preocupación.
  - Brinde educación y orientación anticipatoria para asegurar que los niveles de plomo no se eleven.
  - Considere un nuevo examen en 12 meses en base a los factores de riesgo y preocupaciones.

- **BLL >5 ug/dL**
  - **Los niños con resultados capilares de 5 ug/dL y superiores deberán acceder a una extracción de sangre venosa confirmatoria.**
  - Las familias deberán recibir una guía anticipatoria, consejos sobre nutrición, instrucciones sobre técnicas de limpieza segura y seguimiento de cuidado adecuado por parte de su proveedor principal.
  - Los servicios en el hogar que incluyen manejos de casos e investigaciones medioambientales están disponibles para todos los niños con niveles de plomo superiores a 5 ug/dL. Derive a los pacientes al Genesee County Health Department para el acceso a este servicio.
  - Los niños con resultados confirmados de exámenes venosos superiores a 5ug/dL dentro de los últimos 18 meses deberán volver a ser examinados en base a la política de Medicaid y las pautas de AAP. (Consulte la "Guía Rápida del Proveedor" adjunta). Si un niño no fue examinado nuevamente dentro de estos límites de tiempo, se recomienda un nuevo examen tan pronto como sea posible.
- **BLL > 44 ug/dL.**
  - **Los niños con resultados capilares de 5 ug/dL y superiores deberán acceder a una extracción de sangre venosa confirmatoria.**
  - Los niveles de plomo superiores a 44 ug/dL podrán requerir hospitalización. Para mayor orientación, consulte a un experto del Children's Hospital of Michigan en Detroit.
  - Las familias deberán recibir una guía anticipatoria, consejos sobre nutrición, instrucciones sobre técnicas de limpieza segura y seguimiento de cuidado adecuado por parte de su proveedor principal.
  - Los servicios en el hogar que incluyen manejos de casos e investigaciones medioambientales están disponibles para todos los niños con niveles de plomo superiores a 5 ug/dL. Derive a los pacientes al Genesee County Health Department para el acceso a este servicio.
  - Los niños con resultados confirmados de exámenes venosos superiores a 5ug/dL dentro de los últimos 18 meses deberán volver a ser examinados en base a la política de Medicaid y las pautas de AAP. (Consulte la "Guía Rápida del Proveedor" adjunta). Si un niño no fue examinado nuevamente dentro de estos límites de tiempo, se recomienda un nuevo examen tan pronto como sea posible.

Recordatorio: Todos los niños de 1 y 2 años con cobertura de Medicaid deberán ser examinados.

Cuidado de seguimiento. Como proveedores, hay pasos que ustedes pueden seguir para ayudar a sus familias:

1. Continúe informando y educando a las familias en relación a los riesgos del plomo y los pasos preventivos que pueden seguir para minimizar los riesgos.
2. Aliente a las familias a usar agua filtrada para beber, mezclar fórmula y lavar los platos. Las familias pueden comunicarse al 2-1-1 para acceder a información sobre filtros de agua Certificados por NSF gratuitos.
3. Una nutrición saludable es crítica para los niños expuestos al plomo. Asegúrese de que sus pacientes estén consumiendo dietas balanceadas altas en hierro, calcio y vitamina C. Ante cualquier preocupación sobre la nutrición, considere la recomendación de un multivitamínico con hierro. WIC y SNAP brindan asistencia a los padres y niños que necesitan comidas frescas y saludables. Para más información, comuníquese a la oficina del WIC del Condado de Genesee al (810) 237-4537. Además, SNAP ofrece un programa de Double Bucks que pueden brindar comidas saludables a un menor precio.
4. La alimentación de pecho representa una alta protección y es recomendada. Sin embargo, si el nivel de plomo en la sangre de la madre supera los 40 ug/dL o su nivel es superior a 20 ug/dL y el bebé tiene un nivel superior a 5 ug/dL, no se recomienda la alimentación de pecho.
5. Debido a que el plomo es una neurotoxina, los niños con envenenamiento de plomo necesitan un seguimiento longitudinal y podrán requerir servicios de intervención para el desarrollo y salud mental. Continúe monitoreando el desarrollo de sus pacientes en cada visita.

6. Considere servicios de cuidado y apoyo adicionales que beneficiarán a sus pacientes, tales como programas de visita al hogar para la niñez temprana, Early Head Start y Head Start. Llame al 2-1-1 para más información.

Recursos locales. Varios recursos locales están disponibles para usted y sus pacientes:

- Examen de sangre. Se alienta a los pacientes a comunicarse con su proveedor principal para un examen. El Genesee County Health Department también administra exámenes de plomo. Los pacientes que necesiten transporte se deberán comunicar al 2-1-1 para solicitar ayuda.
- Examen del agua. El examen del agua es gratuito a través de la Planta de Evaluación del Agua de la Ciudad de Flint. Para más información, los pacientes se pueden comunicar al (810) -787-6537.
- WIC y SNAP brindan asistencia a los padres y niños que necesitan comidas frescas y saludables. Para más información, comuníquese a la oficina del WIC del Condado de Genesee al (810) 237-4537.
- Desarrollo infantil. Ante cualquier duda sobre el crecimiento, desarrollo o aprendizaje del niño, comuníquese al 2-1-1 para consultar sobre el Home Visiting Program (Programa de Visitas al Hogar) en su área.

Dear Resident,

From previous contact with the Flint Water Response Team, you have been identified as a home that indicated you would be willing to participate in follow up sampling and monitoring of your water quality.

We stopped by today to discuss additional sampling, check your plumbing and coordinate with you on sampling protocols.

If you would still like to participate, and we hope you do, please call the Environmental Assistance Center at 1-800-662-9278 and we will find a time that works for you to have us stop back at your home.

Thank you,

Michigan Department of Environmental Quality

VTS NEWS……

- VTS consultants met with GM Fleet Account Executive Connie Scarpelli and GM Sales Support and Police Vehicle Specialist Todd Little to discuss the delay of the Impala Limited and Chevrolet truck issues. The production of the fleet Impala Limited was delayed from December 10th through January 14th with final vehicle orders being excepted through mid-January.

- Staff from the VTS Garage and Canfield Equipment worked together in an effort to save costs on beacons and hood signs for MSP vehicles. Canfield Equipment picked up, from VTS, a large quantity of used beacons and hood signs that have been removed from retired MSP vehicles. These used beacons and hood signs will be reconditioned and reuse on new MSP vehicles. MSP is not required to purchase all new parts for their patrol vehicles, so by recycling these items, it saves money.

- A number of VTS staff attended the 2016 North American International Auto Show held at the Cobo Center in Detroit. This is an opportunity to preview the new model vehicles on display and talk with company representatives about current and future product offerings. Vince Reynolds and Ronda Greko also had the opportunity to attend the "Pre-Show" Product Preview" and talk one-on-one with Ford and Chrysler Representatives along with Company Executives, Engineers and Designers.

- GPS Telematics Update: VTS Consultants working with their Telematics Vendors and participating departments continue to meet and discuss reporting options, what works and what doesn't, and any issues that come up. Vince Reynolds attended a high level meeting with MDARD Deputy Director, Division Directors, Supervisors, and Managers who met with GPSInsight Representatives. GPSInsight demonstrated the overall capabilities and limitations of the system. They also showed some of the reporting functions. This presentation was scheduled to determine what educational opportunities might be used with the pilot participants. The presentation was received very highly by the MDARD staff and online, follow-up sessions were scheduled for the following week so that the attendees could observe the system function in real time.

- Beginning January 13th, VTS Garage employees John Lance, Kevin Moe and John Patterson have worked many hours, seven days a week, while putting their family and VTS duties second, assisting with water delivery efforts in Flint. Their primary mission has been to transport pallets of bottled water from a central warehouse to various fire departments. We thank them for their efforts along with their dedication to helping the people of Flint.

- VTS Garage staff loaded a cube truck full of surplus plastics and delivered to Louis Padnos for recycling.

DTMB Director Briefing
Michigan Department of Human Services
APM – Management Briefing

Update

DHS FBSA Projects

- We are transitioning the Facilities Supervisor for Grand Tower/DHS for cross-training opportunities. Doug Church will be leaving the building but still consulting on the ongoing projects. Neal Droste will be taking over on January 18. This should not impact operations of the building since the Building Trades Supervisor and staff remains the same but Doug has been there a long time and it may come up.

- Over the last three years, DTMB and DHS have been working together on remodeling the floors at the Grand Tower with new walls, kitchens, lights, paint and carpet. DHS is installing all new furniture and restacking to move more people into the building and getting them out of leased space. Two floors remain before this project is complete. Work begins on the 2nd floor Monday, January 12, 2015.

- DTMB remodeled the snack shop at the Grand Tower and a new operator is in place.

- Design and Construction is providing assistance on numerous projects at Walter Reuther Hospital. DHS does not have the staff to handle the work so Chris Bahjet from DCD has been providing them as much assistance as possible. The hospital is in poor condition and there is much going on in terms of activity there. No major issues that we are aware of.

Issues/Concerns

- The Grand Tower is going through an air handling unit replacement project and there are numerous walls opened up on the floors with plywood covering the holes. There are construction workers throughout the building. Key Contacts will be updated at a meeting on January 14th at 10am. Building Operations has been working with the tenants on a daily basis with temperature issues this project is causing. A temporary cooling unit has been installed on the 2nd and 3rd floors to help with the temperature.

- The City of Flint issued a notice that the drinking water does not meet treatment requirements as the maximum containment level for trihalomethanes is exceeded. While they did not require any special action, Building Operations Division has rented water coolers and placed them on each occupied floor and placed them next to the water fountains. The notice has also been posted next to each water fountain.

- Sunday morning 1-11-15 a heating loop water leak was noticed on the 8th floor of the Grand Tower building. The water ran down from 8th floor to 1st floor along the perimeter of the building on the North West corner. The water was contained to the corner of the building only. Crews were in Sunday 1-11-15 to remove the water, clean and repair the leak. Additional cleaning and inspections are ongoing the next few days.

- Glendale Office in Highland Park (Lease)
  City water pressure too low to continue operations as fire suppression system will not operate. City is also our landlord and has been slow to respond. A.G. is evaluating our ability to cancel. There are outstanding bonds that the City owes for construction, but we have little choice but to cancel. DHS wants to stop paying rent, but we need to follow a procedure to do so. City MAY be finally making efforts to repair a main.

- Flint McCree ramp (Lease)
  Flint McCree building is owned by Genesee County. While the building is in fair shape the parking ramp is in poor condition. AG has evaluated our ability to cancel. State has limited legal options. State and County are considering alternative parking. If alternative parking not provided by County, State MAY be able to cancel.

- Issues could come up regarding the renovation of the Flint State Office Building. We are over 6 months past the original estimated completion date of the front entrance and skywalk due to contractor delays and currently have no estimated completion date. This will be the second winter that employees have to walk outside instead of the skywalk. This is especially contentious because after the contractor closed it down last year they did not actively work on it. Building Operations and Design and Construction are working with the contractor on this issue but there are frustrated customers.

Follow-Up Items from Prior Meeting(s)

- DHS is printing their own ID badges at remote/out-state DHS facilities. So far, everything appears to be going ok with this.

Procurement Card and Administrative Services
Staff Meeting Agenda
January 21, 2016

Follow-Up:

- OpEx

DAVID B. BEHEN
DIRECTOR

January 29, 2016

TO: State of Michigan Procurement Leadership

FROM: DTMB Procurement

SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State ~~of Michigan~~ Emergency Operations Center (SEOC). Flint related purchases must **first** be routed through the appropriate State Emergency Operations Center (SEOC) contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC emergency manager representative with a 24/7 phone number for agency purchasing staff support, and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC emergency manager representative.

Questions, concerns, or comments should be directed to:

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

January 15, 2016

TO: Amy Miller, DTMB Human Resources

FROM: Chris Christensen, Director, Office of Infrastructure Protection

SUBJECT: Overtime Exception Requests for TKU 746 Employees

Please grant overtime exceptions for the following employees for the year 2016. Currently Jeanette Doll and Ryan McKee are reporting to the State Emergency Operations Center (SEOC) in response to the Flint Water Crisis. However, any of them may need to work overtime hours at any time during the year due to emergencies or incidents impacting State assets or resources.

Jeanette Doll, Dept. Analyst 12 – EID 567608

Jeanette is the Emergency Management Coordinator representing DTMB at the SEOC. In the event of an emergency that causes the activation of the SEOC she must be accessible and available on short notice to report the SEOC. During emergencies she must be available 24/7.

Ryan McKee, Dept. Analyst 11 – EID 1086315

Ryan is the back-up to both Jeanette Doll and Jeff Pratt. During activation of the SEOC he provides relief coverage and assistance as needed. He must be available 24/7 during SEOC activation. When Jeff Pratt is out-of-the-office and unavailable to perform his normal duties Ryan must be available on short notice based on emergencies and/or on-going incidents and must be available 24/7.

Jeff Pratt, Dept. Analyst 12 – EID 207682

Jeff is the Security Program Coordinator for DTMB and is responsible for management of daily security operations at DTMB-managed facilities State-wide. He must be accessible and available on short notice based on emergencies and/or on-going incidents 24/7.

If you have questions or need further information please do not hesitate to contact me.

Check Processing: In accordance with Federal Reserve Board guidelines, when you provide a check as payment, you authorize us to use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check transaction. When we use information from your check to make an electronic fund transfer, funds may be withdrawn from your account as soon as the same day we receive your payment and you will not receive your check back from your financial institution. For further information visit: www.electronicpayments.org and click on the Check Conversion tab.

If service is canceled during a billing cycle, the customer will remain responsible for all charges, fees and taxes through the end of the billing cycle. There will be no proration of billing, and the customer will not be entitled to a refund for the period between the notice of termination and the end of the current billing cycle. This provision will not apply if it is contrary to a current franchise agreement, municipal contract, or other written contract applicable to this account or is otherwise prohibited by law.

The Company reserves the right to require that payment for services be made only by check, credit card or money order, unless otherwise required by contract or applicable law.

Use of IPad constitutes acceptance of the IPad terms and conditions and other third party terms and conditions found in the IPad box, or at http://www.apple.com/legal/sla/

The sales tax for IPad varies by state and may be based on the unbundled purchase price rather than the actual purchase price.

If you are not fully satisfied with your IPad purchase, you can return your undamaged IPad within 14 days of purchase for a full refund with no restocking fee.

If you disagree with these terms and conditions you can return the IPad in accordance with the Apple Store's return policy http://www.apple.com/legal/sales_policies/retail.htm

Credit Card Payment: $173.10

Net Paid Today: $173.10

SafeMove Declined for Equipment DC 1730L .

- I agree to verify my truck's fuel level is 11/16 before leaving the premises. I will return the vehicle with the same amount of fuel as when dispatched and/or agree to pay a $3.50 per gallon convenience fee for the estimated fuel I do not replace. If returned with less than a 1/4 tank, I agree to also pay a $30.00 service fee. U-Haul does not reimburse if this truck is returned with more fuel than what is printed on the receipt gauge. U-Haul pays for oil (save receipts).

U-Haul liability for injury or death is limited to $20,000 per person up to $40,000 per accident and only if the vehicle is operated by the lessee or the lessee`s immediate family member. The lessee may be liable to U-Haul and the injured person/estate for any amount awarded because of injury or death.

- U-Haul provides the Customer with minimum limits of protection required by that state or province where arises any claim, suit or cause of action. This provided protection is in excess or secondary to any insurance coverage(s) of the Customer. Customer assumes Sole Responsibility for any and all liability that exceeds the applicable minimum limits of protection for that state or province.
- I understand that this equipment must be returned to the same U-Haul location where it was rented. I understand that the minimum rental charge for equipment returned to a different location is twice the amount of the current One Way rate from this U-Haul location to the actual drop-off location.
- I understand that the equipment rented is water resistant and not water proof.
- I acknowledge that I have received the appropriate User Instructions and acknowledge my responsibility to fully read and understand these User Instructions before operating the equipment.
- I understand that I will receive an email link to review the rental process and the U-Haul Store employees to feedback to U-Haul any compliments, concerns or requests that I have about my rental.
- I understand that I can also contact U-Haul Customer Service at uhaul.com/contact/email.aspx
- I understand that I am financially responsible for all damages to equipment.
- I agree to submit all *legal* claims in accordance with the U-Haul Arbitration Agreement, incorporated by reference, and available at uhaul.com/arbitration or from my local U-Haul representative.

- I agree that distracted driving is dangerous and that driving while distracted is likely to lead to an **accident/crash** causing serious injury or death. I agree not to use a hand held mobile phone (other than for an emergency call) and not to text while driving any U-Haul truck or towing any U-Haul Trailer, Tow Dolly or Auto Transport. My agreement not to do so is material to U-Haul's decision to enter into this Agreement. My failure to comply is material breach of this Agreement.
- The following shall be admissible as evidence of negligence and breach of contract in any lawsuit or arbitration: 1) that the driver of the U-Haul truck, or vehicle towing any U-Haul Trailer, Tow Dolly or Auto Transport was texting while driving; 2) that the driver of the U-Haul truck, or vehicle towing any U-Haul Trailer, Tow Dolly or Auto Transport, was using any mobile phone (other than hands free or for an emergency call) while driving.
- I acknowledge that I have received and agree to the terms and conditions of this Rental Contract and the Rental Contract Addendum.

- The missing equipment charge does not constitute a sale or transfer ownership of equipment. U-Haul is still the owner of this equipment.
- I confirm that during the term of my rental there was not an accident involving the rented U-Haul equipment and no incidence where this equipment struck or otherwise caused damage to any person or property either while on a public road or private property. There was no injury or damage sustained by me or any other drivers or passengers of this equipment.

All purchases were made in support of the Flint Water Crisis and should be billed to Index 90055.

The receipts for the Best Buy Purchase and Best Buy Credit in the amount of $69.96 have been misplaced.

We are still trying to obtain the receipt for DTV DirecTV Service in the amount of $99.49 and the receipt for U-Haul Dort HWY in the amount of $173.10. I will send a complete statement once those are received and Chris' supervisor has signed the statement.

Check Processing: In accordance with Federal Reserve Board guidelines, when you provide a check as payment, you authorize us to use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check transaction. When we use information from your check to make an electronic fund transfer, funds may be withdrawn from your account as soon as the same day we receive your payment and you will not receive your check back from your financial institution. For further information visit: www.electronicpayments.org and click on the Check Conversion tab.

If service is canceled during a billing cycle, the customer will remain responsible for all charges, fees and taxes through the end of the billing cycle. There will be no proration of billing, and the customer will not be entitled to a refund for the period between the notice of termination and the end of the current billing cycle. This provision will not apply if it is contrary to a current franchise agreement, municipal contract, or other written contract applicable to this account or is otherwise prohibited by law.

The Company reserves the right to require that payment for services be made only by check, credit card or money order, unless otherwise required by contract or applicable law.

Use of iPad constitutes acceptance of the iPad terms and conditions and other third party terms and conditions found in the iPad box, or at http://www.apple.com/legal/sla/

The sales tax for iPad varies by state and may be based on the unbundled purchase price rather than the actual purchase price.

If you are not fully satisfied with your iPad purchase, you can return your undamaged iPad within 14 days of purchase for a full refund with no restocking fee.

If you disagree with these terms and conditions you can return the iPad in accordance with the Apple Store's return policy http://www.apple.com/legal/sales_policies/retail.htm

Use of iPad constitutes acceptance of the iPad terms and conditions and other third party terms and conditions found in the iPad box,or at http://www.apple.com/legal/sla/ This iPad model is configured to work only with the wireless services of Sprint.

The sales tax for iPad varies by state and may be based on the unbundled purchase price rather than the actual purchase price.

If you are not fully satisfied with your iPad purchase, you can return your undamaged iPad within 14 days of purchase for a full refund with no restocking fee.

If you disagree with these terms and conditions you can return the iPad in accordance with the Apple Store's return policy http://www.apple.com/legal/sales_policies/retail.htm

Use of iPad constitutes acceptance of the iPad terms and conditions and other third party terms and conditions found in the iPad box,or at http://www.apple.com/legal/sla/ This iPad model is configured to work only with the wireless services of Sprint.

The sales tax for iPad varies by state and may be based on the unbundled purchase price rather than the actual purchase price.

If you are not fully satisfied with your iPad purchase, you can return your undamaged iPad within 14 days of purchase for a full refund with no restocking fee.

If you disagree with these terms and conditions you can return the iPad in accordance with the Apple Store's return policy http://www.apple.com/legal/sales_policies/retail.htm

- The missing equipment charge does not constitute a sale or transfer ownership of equipment. U-Haul is still the owner of this equipment.
- I confirm that during the term of my rental there was not an accident involving the rented U-Haul equipment and no incidence where this equipment struck or otherwise caused damage to any person or property either while on a public road or private property. There was no injury or damage sustained by me or any other drivers or passengers of this equipment.

	A	B	C	D	E
1	Application category	Application number	Application name	Program	Description
2	DEQ	DEQ-2013-02299	305b Database	Water Resources Division	Waters that do not meet water quality standards. Used to prepare 305b report, published every other year. Required by federal mandate. Application is provided by EPA - National Assessment Database.Should be part of MiWaters???
3	DEQ	DEQ-2010-00385	Administrative Accounting Interface (AAI) Toolkit	Administration Division	AAI is the software used to import data from agency program systems into Navision for invoice generation. This was originally supported by DTMB Agency Services, then DTMB/MDOT for a period of time, and is back to being supported by DTMB Customer Services. Key contact/user is Kathy Willoughby
4	DEQ	DEQ-2010-01235	AppGuard	Office of Drinking Water and Municipal Assistance	Provides method for logging into and maintaining access to specific DEQ and MDA applications.used by MACES (AQD) and Water Track (RMD)We don't need it to be replaced, but we need it to be maintained, along with WaterTrack, until we are fully into SDWIS Prime, which could be several years, but hopefully would be within a couple years, depending upon how fully functional SDWIS Prime turns out to be in its first iteration.
5	DEQ	DEQ-2010-00493	Aquatic Nuisance Web Query	Water Resources Division	Track Aquatic Nuisance Control permit applications.will be part of MiWaters
6	DEQ	DEQ-2010-00172	BeachGuard	Water Resources Division	DEQ monitors approximately 1700 public and private beaches in Michigan. DEQ developed the Beach Guard System to provide public information on beach water sampling results, beach advisories and beach closures. SOW being developed to replace system with new BeachGuard application.
7	DEQ	DEQ-2013-02301	BeachGuard Secure	Water Resources Division	SOW being developed to replace system with new BeachGuard application.
8	DEQ	DEQ-2010-00585	Biosurvey Database	Water Resources Division	Stream survey data, capturing the variety and quantity of species of fish and invertibrates. High - will submit ITSR
9	DEQ	DEQ-2010-00997	Bottle Order App	Office of Drinking Water and Municipal Assistance	Shipping and ordering module for sample ordering. The DTMB estimate for re-writing this application is $31,500. The RRD will not pursue updating this application with DTMB resources.

60	DEQ	DEQ-2010-00896	Office of Criminal Investigations (OCI) Case Tracking	Executive Division	Log of current and historical criminal investigations.Vince Woods is contact. High Upgraded and working in Windows 7 per Vence Woods
61	DEQ	DEQ-2013-02390	Office View Pro		COTS software package. Office View Pro is a vendor application written by Len Phillips from Office View Software Inc. This is a product that DEQ purchased a while ago. Only the DEQ uses this application including field offices in Gaylord, Grand Rapids, Kalamazoo, Cadillac, Jackson, Detroit, Southeast Michigan, Upper Peninsula, Lansing, Water Division, Remedial Action, and Waste Management Divisions. The software is installed on a share point on each district server. Each user in the district and local offices, load the software on their computers from each share point. There is an Administrator in each district office that adds new user ids to each list. This application will be replaced with Lync and is being decommissioned.
62	DEQ	DEQ-2010-00957	Online Web Inquiry System (OWIS)	Water Resources Division	Online application for National Pollutant Discharge Elimination Management System.will be part of MiWaters

73	DEQ	DEQ-2010-00845	Safe Drinking Water Information System (SDWIS) State	Office of Drinking Water and Municipal Assistance	The Safe Drinking Water Information System (SDWIS)/FED (federal version) contains information about public water systems and their violations of Environmental Protection Agency (EPA) drinking water regulations, as reported to EPA by the states. These regulations establish maximum contaminant levels, treatment techniques and monitoring and reporting requirements to ensure that water systems provide safe water to their customers.SDWIS/STATE (Safe Drinking Water Information System/state version) is a database designed by EPA to help states run their drinking water programs. SDWIS/STATE is the state counterpart to EPA's federal drinking water information system.This system is being replace by SIDWIS Prime project.
74	DEQ	DEQ-2010-01409	Salvage	Water Resources Division	Permit application records for underwater salvage operations throughout Michigan including shipwrecks and other underwater cultural resources, such as prehistoric sites, piers, wharves and other structures. will be part of MiWaters
75	DEQ	DEQ-2014-02409	SARA Title III	Office of Environmental Assistance	SARA Title III establishes requirements for Federal, State and local governments, Indian Tribes, and industry regarding emergency planning and Community Right-to-Know reporting on hazardous and toxic chemicals. The Community Right-to-Know provisions help increase the public's knowledge and access to information on chemicals at individual facilities, their uses, and releases into the environment. States and communities, working with facilities, can use the information to improve chemical safety and protect public health and the environment.

126	DNR	DNR -2010-00103	Commercial Forest	Forest Resources Division	Data for storing commercial forest information.
127	DNR	DNR -2010-01753	Commercial Forest (CF) DataViewer	Forest Resources Division	Application for viewing map data for commercial forests.
128	DNR	DNR -2010-02085	Cormorant Activity Report	Wildlife Division	Public observations of cormorant activity.There has been a project on the large project list to consolidate all these reporting applications for a few years. The Division still needs to provide the public a place to report sightings and observations, however, one system to report on all species makes the most sense.
129	DNR	DNR -2010-01322	Correspondence Tracking Database (a.k.a. Log Letter)	All Divisions	Correspondence Tracking Database (also known as Log Letter).Judy Tkaczyk
130	DNR	DNR -2010-01745	Cougar, Lynx and Bobcat Observation Report	Wildlife Division	Public observations of feline species activity.Same note for all Species Sighting and Observation Reporting apps.
131	DNR	DNR -2010-01261	Crash Data Import	Law Enforcement Division	Windows form application that imports MSP crash data (from UD-10 forms) about ORV and snowmobile accidents and parses the data into various SQL tables for Law Enforcement Division analysis.
132	DNR	DNR -2013-02265	Cultural and Scientific Collector's Permit (SCP) Application on the Web	Fisheries Division	Provides Michigan citizens with the opportunity to apply for a cultural and scientific collector's permit via the web.
133	DNR	DNR -2013-02266	Cultural and Scientific Collector's Permit (SCP) Application Status on the Web	Fisheries Division	A public-facing web site that allows individuals to check on the status of their Cultural and Scientific Collector's Permit on-line.
134	DNR	DNR -2010-00750	Cultural and Scientific Collector's Permit System (SCP)	Fisheries Division	The Cultural and Scientific Collector's Permit System assists the DNR Fisheries Division with processing applications, and managing permits, for the collection or possession of fish, reptiles, amphibians, crustaceans, or mollusks in Michigan.
135	DNR	DNR -2010-00772	Customer Log (CUSTLOG) System		Customer Log on Citrix.Andrew Evans is a client contact.Still being used and will need to have legacy code rewritten.
136	DNR	DNR -2010-00097	Database Applications (DBAPPS)	All Divisions	Inventory of Database Applications and Project Tracking.
137	DNR	DNR -2010-00400	Deer Check Totals (Intranet)	Wildlife Division	Displays deer check totals and summaries.
138	DNR	DNR -2010-01691	Deer Harvest Survey	Wildlife Division	Allows hunters to report their deer hunting activity.

	A	B	C	D	E
167	DNR	DNR -2010-00911	Fish Health Inspection System	Fisheries Division	A Microsoft Access system with a SQL/Server back-end designed to collect, manage, and report fish health inspection and laboratory report data in Michigan.This system will not be upgraded. Instead is should be merged in with the Wild Aquatic Organism Pathogen Web Site
168	DNR	DNR -2014-02408	Fish Population Trends	Fisheries Division	THIS APPLICATION IS SUPPORTED BY DTMB-CENTER FOR SHARED SOLUTIONS. This web-based system uses key data from Michigan's Stream Status and Trends Program and the Fish Collection System. Maps, graphs and tabular data is presented showing the current status of fish population levels at approximately 70 index sites across the state. Production URL is http://www.mcgi.state.mi.us/fishpop/
169	DNR	DNR -2014-02408	Fish Population Trends	Fisheries Division	THIS APPLICATION IS SUPPORTED BY DTMB-CENTER FOR SHARED SOLUTIONS. This web-based system uses key data from Michigan's Stream Status and Trends Program and the Fish Collection System. Maps, graphs and tabular data is presented showing the current status of fish population levels at approximately 70 index sites across the state. Production URL is http://www.mcgi.state.mi.us/fishpop/
170	DNR	DNR -2010-00665	Fish Production System	Fisheries Division	Collects, manages, and reports information related to hatchery incubation and fish rearing activities performed by the Fisheries Division of the DNR. Special quarterly maintenance is required as well as general maintenance and user support.
171	DNR	DNR -2010-01722	Fish Reporting System	Fisheries Division	Application for the staff to add new data to the field survey database. Web site: http://www.dnr.state.mi.us/chartercreel/
172	DNR	DNR -2010-00238	Fish Stocking Database	Fisheries Division	Web page for members of the general public to query the Fish Stocking Database. Users may search for fish stocking activity by county, water body, and/or species with a specified date range.
173	DNR	DNR -2010-02137	Fish Stocking Information System	Fisheries Division	Provide general user assistance and system support. Maintains SOM stocking waters and sites/ stocking records and plans.

243	DEQ	DEQ-2010-00817	Michigan Air Emissions Reporting System (MAERS)	Air Quality Division	annual emissions data. Includes information on the facility, processes, operational throuputs, and estimated emissions. Michigan Air Emissions Reporting System (MAERS) Web Query Utility. This query utility allows for searching of total emissions by facility, source classification codes, & emission factors. This utility actually has three queries. Currently the main page is located at http://www.deq.state.mi.us/maers/. The back end for each is on SQL. Three queries accessed from http://www.deq.state.mi.us/maers/.1) Emission Inventory Source & Emissions at http://www.deq.state.mi.us/maers/emissions_query.asp. Query currently is used by the public and is working correctly. Leave "as is" until that time when DTMB will definitely get rid of this technology. When that date is known, AQD will submit an ITSR to replace it before the ASP page goes off-line. Its priority score will be to place it at the bottom of the docket for either the <200 hours list or the >=200 hours list. If >=200 hours, a "Beaulac Score" will be submitted at that time.2) Source Classification Codes at http://www.deq.state.mi.us/maers/scc_query.asp.

285	DEQ	DEQ-2013-02390	Office View Pro (closed)		COTS software package. Office View Pro is a vendor application written by Len Phillips from Office View Software Inc. This is a product that DEQ purchased a while ago. Only the DEQ uses this application including field offices in Gaylord, Grand Rapids, Kalamazoo, Cadillac, Jackson, Detroit, Southeast Michigan, Upper Peninsula, Lansing, Water Division, Remedial Action, and Waste Management Divisions. The software is installed on a share point on each district server. Each user in the district and local offices, load the software on their computers from each share point. There is an Administrator in each district office that adds new user ids to each list. This application will be replaced with Lync and is being decommissioned.Primary Developer: Linda DuCharme

74	DEQ	DEQ-2010-00845	Safe Drinking Water Information System (SDWIS) State	Office of Drinking Water and Municipal Assistance	The Safe Drinking Water Information System (SDWIS)/FED (federal version) contains information about public water systems and their violations of Environmental Protection Agency (EPA) drinking water regulations, as reported to EPA by the states. These regulations establish maximum contaminant levels, treatment techniques and monitoring and reporting requirements to ensure that water systems provide safe water to their customers.SDWIS/STATE (Safe Drinking Water Information System/state version) is a database designed by EPA to help states run their drinking water programs. SDWIS/STATE is the state counterpart to EPA's federal drinking water information system.This system is being replace by SIDWIS Prime project.
75	DEQ	DEQ-2010-01409	Salvage	Water Resources Division	Permit application records for underwater salvage operations throughout Michigan including shipwrecks and other underwater cultural resources, such as prehistoric sites, piers, wharves and other structures. will be part of MiWaters
76	DEQ	DEQ-2014-02409	SARA Title III	Office of Environmental Assistance	SARA Title III establishes requirements for Federal, State and local governments, Indian Tribes, and industry regarding emergency planning and Community Right-to-Know reporting on hazardous and toxic chemicals. The Community Right-to-Know provisions help increase the public's knowledge and access to information on chemicals at individual facilities, their uses, and releases into the environment. States and communities, working with facilities, can use the information to improve chemical safety and protect public health and the environment.

NIOSH Pocket Guide to Chemical Hazards

Cesium hydroxide

CAS

21351-79-1

RTECS

FK9800000

DOT ID & Guide

2682 / 157
2681 / 154 (solution)

CsOH

Synonyms & Trade Names

Cesium hydrate, Cesium hydroxide dimer

Exposure Limits

NIOSH REL: TWA 2 mg/m^3
OSHA PEL†: none

IDLH

Conversion

N.D. See: IDLH INDEX

Physical Description

Colorless or yellowish, crystalline solid. [Note: Hygroscopic (i.e., absorbs moisture from the air).]

MW: 149.9	BP: ?	MLT: 522°F	Sol(59°F): 395%
VP: 0 mmHg (approx)	IP: NA		Sp.Gr: 3.68
Fl.P: NA	UEL: NA	LEL: NA	

Noncombustible Solid

Incompatibilities & Reactivities

Water, acids, CO_2, metals (e.g., Al, Pb, Sn, Zn), oxygen [Note: CsOH is a strong base, causing the generation of considerable heat in contact with water or moisture.]

Measurement Methods

None available
See: NMAM or OSHA Methods

Personal Protection & Sanitation

(See protection)
Skin: Prevent skin contact
Eyes: Prevent eye contact
Wash skin: When contaminated
Remove: When wet or contaminated
Change: Daily
Provide: Eyewash, Quick drench

First Aid

(See procedures)
Eye: Irrigate immediately
Skin: Water flush immediately
Breathing: Respiratory support
Swallow: Medical attention immediately

Respirator Recommendations

Not available.
Important additional information about respirator selection

Exposure Routes

inhalation, ingestion, skin and/or eye contact

Symptoms

Irritation eyes, skin, upper respiratory system; eye, skin burns

Target Organs

Eyes, skin, respiratory system

INTRODUCTION

The *NIOSH Pocket Guide to Chemical Hazards* is intended as a source of general industrial hygiene information for workers, employers, and occupational health professionals. The *Pocket Guide*presents key information and data in abbreviated tabular form for 677 chemicals or substance groupings (e.g., manganese compounds, tellurium compounds, inorganic tin compounds, etc.) that are found in the work environment. The industrial hygiene information found in the *Pocket Guide* should help users recognize and control occupational chemical hazards. The chemicals or substances contained in this revision include all substances for which the National Institute for Occupational Safety and Health (NIOSH) has recommended exposure limits (RELs) and those with permissible exposure limits (PELs) as found in the Occupational Safety and Health Administration (OSHA) General Industry Air Contaminants Standard (29 CFR 1910.1000).

Background

In 1974, NIOSH (which is responsible for recommending health and safety standards) joined OSHA (whose jurisdictions include promulgation and enforcement activities) in developing a series of occupational health standards for substances with existing PELs. This joint effort was labeled the Standards Completion Program and involved the cooperative efforts of several contractors and personnel from various divisions within NIOSH and OSHA. The Standards Completion Program developed 380 substance-specific draft standards with supporting documentation that contained technical information and recommendations needed for the promulgation of new

occupational health regulations. The *Pocket Guide* was developed to make the technical information in those draft standards more conveniently available to workers, employers, and occupational health professionals. The *Pocket Guide* is updated periodically to reflect new data regarding the toxicity of various substances and any changes in exposure standards or recommendations.

Data Collection and Application

The data were collected from a variety of sources, including NIOSH policy documents such as criteria documents and Current Intelligence Bulletins (CIBs), and recognized references in the fields of industrial hygiene, occupational medicine, toxicology, and analytical chemistry.

NIOSH RECOMMENDATIONS

Acting under the authority of the Occupational Safety and Health Act of 1970 (29 USC Chapter 15) and the Federal Mine Safety and Health Act of 1977 (30 USC Chapter 22), NIOSH develops and periodically revises recommended exposure limits (RELs) for hazardous substances or conditions in the workplace. NIOSH also recommends appropriate preventive measures to reduce or eliminate the adverse health and safety effects of these hazards. To formulate these recommendations, NIOSH evaluates all known and available medical, biological, engineering, chemical, trade, and other information relevant to the hazard. These recommendations are then published and transmitted to OSHA and the Mine Safety and Health Administration (MSHA) for use in promulgating legal standards.

NIOSH recommendations are published in a variety of documents. Criteria documents recommend workplace exposure limits and appropriate preventive measures to reduce or eliminate adverse health effects and accidental injuries.

Current Intelligence Bulletins (CIBs) are issued to disseminate new scientific information about occupational hazards. A CIB may draw attention to a formerly unrecognized hazard, report new data on a known hazard, or present information on hazard control.

Alerts, Special Hazard Reviews, Occupational Hazard Assessments, and Technical Guidelines support and complement the other standards development activities of the Institute. Their purpose is to assess the safety and health problems associated with a given agent or hazard (e.g., the potential for injury or for carcinogenic, mutagenic, or teratogenic effects) and to recommend appropriate control and surveillance methods. Although these documents are not intended to supplant the more comprehensive criteria documents, they are prepared to assist OSHA and MSHA in the formulation of regulations.

In addition to these publications, NIOSH periodically presents testimony before various Congressional committees and at OSHA and MSHA rulemaking hearings.

Recommendations made through 1992 are available in a single compendium entitled *NIOSH Recommendations for Occupational Safety and Health: Compendium of Policy Documents and Statements* [DHHS (NIOSH) Publication No. 92-100].

More recent recommendations are available on the NIOSH Web site (http://www.cdc.gov/niosh). Copies of the *Compendium* may be ordered from the NIOSH Publications office (800-356-4674).

HOW TO USE THIS POCKET GUIDE

The *Pocket Guide* has been designed to provide chemical-specific data to supplement general industrial hygiene knowledge. To maximize the amount of data provided in this limited space, abbreviations and codes have been used extensively. These abbreviations and codes, which have been designed to permit rapid comprehension by the regular user, are discussed for each column in the following subsections.

The chemical name found in the OSHA General Industry Air Contaminants Standard (29 CFR 1910.1000) is listed in the top left portion of each chemical table.

Chemical Name

The chemical name found in the OSHA General Industry Air Contaminants Standard (29 CFR 1910.1000) is listed in the top left portion of each chemical table.

Structure/Formula

The chemical structure or formula is listed under the chemical name in each chemical table. Carbon-carbon double bonds (-C=C-) have been indicated where applicable.

CAS Number

This Chemical Abstracts Service (CAS) registry number is provided in the top right portion of the chemical tables. The CAS number, in the format xxx-xx-x, is unique for each chemical and allows efficient searching on computerized data bases. The CAS number index can be used to find a chemical based on the CAS number.

RTECS Number

This section lists the Registry of Toxic Effects of Chemical Substances (RTECS®) number, in the format ABxxxxxxx. RTECS®may be useful for obtaining additional toxicologic information on a specific substance. The RTECS number index can be used to find a chemical based on the RTECS® number.

RTECS® is a compendium of data extracted from the open scientific literature. On December 18, 2001, CDC's Technology Transfer Office, on behalf of NIOSH, successfully completed negotiating a "PHS Trademark Licensing Agreement" for RTECS®. This non-exclusive licensing agreement provides for the transfer and continued development of the "RTECS®database and its trademark" to MDL Information Systems, Inc. (MDL), a wholly owned subsidiary of Elsevier Science, Inc. Under this agreement, MDL will be responsible for updating, licensing, marketing, and distributing RTECS®. For more information visit the MDL web site.

DOT ID and Guide Number

This section lists the U.S. Department of Transportation (DOT) Identification numbers and the corresponding Guide numbers. Their format is xxxx yyy. The Identification (ID) number (xxxx) indicates that the chemical is regulated by DOT. The Guide number (yyy) refers to actions to be taken to stabilize an emergency situation; this information can be found in the / *2004 Emergency Response Guidebook* (Office of Hazardous Materials Initiatives and Training [DHM-50], Research and Special Programs Administration, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590-0001; for sale by the U.S. Government Printing Office, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954). Please note however, that many DOT numbers are **not**

unique for a specific substance.

Synonyms and Trade Names

This section of each chemical table contains an alphabetical list of common synonyms and trade names for each chemical. The Chemical Name, Synonym and Trade Name Index can be used to search for chemical pages. This index also includes the primary chemical names for all of the chemicals in the *Pocket Guide*.

Conversion Factors

This section lists factors for the conversion of ppm (parts of vapor or gas per million parts of contaminated air by volume) to mg/m^3(milligrams of vapor or gas per cubic meter of contaminated air) at 25°C and 1 atmosphere for chemicals with exposure limits expressed in ppm.

Exposure Limits

The NIOSH recommended exposure limits (**REL**s) are listed first in this section. For NIOSH RELs, "**TWA**" indicates a time-weighted average concentration for up to a 10-hour workday during a 40-hour workweek. A short-term exposure limit (STEL) is designated by "**ST**" preceding the value; unless noted otherwise, the STEL is a 15-minute TWA exposure that should not be exceeded at any time during a workday. A ceiling REL is designated by "**C**" preceding the value; unless noted otherwise, the ceiling value should not be exceeded at any time. Any substance that NIOSH considers to be a potential occupational carcinogen is designated by the notation "**Ca**" (see Appendix A, which contains a brief discussion of potential occupational carcinogens).

The OSHA permissible exposure limits (**PEL**s), as found in Tables Z-1, Z-2, and Z-3 of the OSHA General Industry Air Contaminants Standard (29 CFR 1910.1000), that were effective on July 1, 1993* and which are currently enforced by OSHA are listed next.

> *In July 1992, the 11th Circuit Court of Appeals in its decision in AFL-CIO v. OSHA, 965 F.2d 962 (11th Cir., 1992) vacated more protective PELs set by OSHA in 1989 for 212 substances, moving them back to PELs established in 1971. The appeals court also vacated new PELs for 164 substances that were not previously regulated. Enforcement of the court decision began on June 30, 1993. Although OSHA is currently enforcing exposure limits in Tables Z-1, Z-2, and Z-3 of 29 CFR 1910.1000 which were in effect before 1989, violations of the "general duty clause" as contained in Section 5(a) (1) of the Occupational Safety and Health Act may be considered when worker exposures exceed the 1989 PELs for the 164 substances that were not previously regulated. The substances for which OSHA PELs were vacated on June 30, 1993 are indicated by the symbol "†" following OSHA in this section and previous values (the PELs that were vacated) are listed in Appendix G

TWA concentrations for OSHA **PEL**s must not be exceeded during any 8-hour workshift of a 40-hour workweek. A STEL is designated by "**ST**" preceding the value and is measured over a 15-minute period unless noted otherwise. OSHA ceiling concentrations (designated by "**C**" preceding the value) must not be exceeded during any part of the workday; if instantaneous monitoring is not feasible, the ceiling must be assessed as a 15-minute TWA exposure. In addition, there are a number of substances from Table Z-2 (e.g., beryllium, ethylene dibromide) that have PEL ceiling values that must not be exceeded except for specified excursions. For example, a "5-minute maximum peak in any 2 hours" means that a 5-minute

exposure above the ceiling value, but never above the maximum peak, is allowed in any 2 hours during an 8-hour workday. Appendix B contains a brief discussion of substances regulated as carcinogens by OSHA.

Concentrations are given in ppm, mg/m^3, mppcf (millions of particles per cubic foot of air as determined from counting an impinger sample), or $fibers/cm^3$(fibers per cubic centimeter). The "**[skin]**" designation indicates the potential for dermal absorption; skin exposure should be prevented as necessary through the use of good work practices, gloves, coveralls, goggles, and other appropriate equipment. The "**(total)**" designation indicates that the REL or PEL listed is for "total particulate" versus the "**(resp)**" designation which refers to the "respirable fraction" of the airborne particulate.

Appendix C contains more detailed discussions of the specific exposure limits for certain low-molecular-weight aldehydes, asbestos, various dyes (benzidine-, o-tolidine-, and o-dianisidine-based), carbon black, chloroethanes, the various chromium compounds (chromic acid and chromates, chromium(II) and chromium (III) compounds, and chromium metal), coal tar pitch volatiles, coke oven emissions, cotton dust, lead, mineral dusts, NIAX® Catalyst ESN, trichloroethylene, and tungsten carbide (cemented). Appendix D contains a brief discussion of substances included in the *Pocket Guide* with no established RELs at this time. Appendix F contains miscellaneous notes regarding the OSHA PEL for benzene and the IDLHs for four chloronaphthalene compounds, and Appendix G lists the OSHA PELS that were vacated on June 30, 1993.

IDLH - Immediately Dangerous to Life and Health

This section lists the immediately dangerous to life or health concentrations (IDLHs). For the June 1994 Edition of the *Pocket Guide*, NIOSH reviewed and in many cases revised the IDLH values. The criteria utilized to determine the adequacy of the original IDLH values were a combination of those used during the Standards Completion Program and a newer methodology developed by NIOSH. These "interim" criteria formed a tiered approach, preferentially using acute human toxicity data, followed by acute animal inhalation toxicity data, and then by acute animal oral toxicity data to determine a preliminary updated IDLH value. When relevant acute toxicity data were insufficient or unavailable, NIOSH also considered using chronic toxicity data or an analogy to a chemically similar substance. NIOSH then compared these preliminary values with the following criteria to determine the updated IDLH value: 10% of lower explosive limit (LEL); acute animal respiratory irritation data (RD_{50}); other short-term exposure guidelines; and the *NIOSH Respirator Selection Logic* (DHHS [NIOSH] Publication No. 2005-100) The *Documentation for Immediately Dangerous to Life or Health Concentrations* (NTIS Publication Number PB-94-195047) further describes these criteria and provides information sources for both the original and revised IDLH values. NIOSH currently is assessing the various uses of IDLHs, whether the criteria used to derive the IDLH values are valid, and if other information or criteria should be utilized.

The purpose for establishing an IDLH value in the Standards Completion Program was to determine the airborne concentration from which a worker could escape without injury or irreversible health effects from an IDLH exposure in the event of the failure of respiratory protection equipment. The IDLH was considered a maximum concentration above which only a highly reliable breathing apparatus providing maximum worker protection should be permitted. In determining IDLH values, NIOSH considered the ability of a worker to escape without loss of life or irreversible health effects along with certain transient effects, such as severe eye or respiratory irritation, disorientation, and incoordination, which could prevent escape. As a safety margin, IDLH values are based on effects that might occur as a consequence of a 30-minute exposure. However, the 30-minute period was NOT

meant to imply that workers should stay in the work environment any longer than necessary; in fact, EVERY EFFORT SHOULD BE MADE TO EXIT IMMEDIATELY!

NIOSH Respirator Selection Logic defines IDLH exposure conditions as "conditions that pose an immediate threat to life or health, or conditions that pose an immediate threat of severe exposure to contaminants, such as radioactive materials, which are likely to have adverse cumulative or delayed effects on health." The purpose of establishing an IDLH exposure concentration is to ensure that the worker can escape from a given contaminated environment in the event of failure of the respiratory protection equipment. The *NIOSH Respirator Selection Logic* uses IDLH values as one of several respirator selection criteria. Under the *NIOSH Respirator Selection Logic*, the most protective respirators (e.g., a self-contained breathing apparatus equipped with a full facepiece and operated in a pressure-demand or other positive-pressure mode) would be selected for firefighting, exposure to carcinogens, entry into oxygen-deficient atmospheres, in emergency situations, during entry into an atmosphere that contains a substance at a concentration greater than 2,000 times the NIOSH REL or OSHA PEL, and for entry into IDLH atmospheres. IDLH values are listed in the *Pocket Guide* for over 380 substances.

The notation "**Ca**" appears in the IDLH field for all substances that NIOSH considers potential occupational carcinogens. However, IDLH values that were originally determined in the Standards Completion Program or were subsequently revised are shown in brackets following the "**Ca**" designations. "**10%LEL**" indicates that the IDLH was based on 10% of the lower explosive limit for safety considerations even though the relevant toxicological data indicated that irreversible health effects or impairment of escape existed only at higher concentrations. "**N.D.**" indicates that an IDLH value has not been determined for that substance. Appendix F contains an explanation of the "Effective" IDLHs used for four chloronaphthalene compounds.

Physical Description

This entry provides a brief description of the appearance and odor of each substance. Notations are made as to whether a substance can be shipped as a liquefied compressed gas or whether it has major use as a pesticide.

Chemical and Physical Properties

The following abbreviations are used for the chemical and physical properties given for each substance. "NA" indicates that a property is not applicable, and a question mark (?) indicates that it is unknown.

MW	Molecular weight
BP	Boiling point at 1 atmosphere, °F
Sol	Solubility in water at 68 °F (unless a different temperature is noted), % by weight (i.e., g/100 ml)
Fl.P	Flash point (i.e., the temperature at which the liquid phase gives off enough vapor to flash when exposed to an external ignition source), closed cup (unless annotated "(oc)" for open cup), °F
IP	Ionization potential, eV (electron volts) [Ionization potentials are given as a guideline for the selection of photoionization detector lamps used in some direct-reading instruments.]
VP	Vapor pressure at 68 °F (unless a different temperature is noted), mm Hg;

	"approx" indicates approximately
MLT	Melting point for solids, °F
FRZ	Freezing point for liquids and gases, °F
UEL	Upper explosive (flammable) limit in air, % by volume (at room temperature unless otherwise noted)
LEL	Lower explosive (flammable) limit in air, % by volume (at room temperature unless otherwise noted)
MEC	Minimum explosive concentration, g/m^3 (when available)
Sp.Gr	Specific gravity at 68 °F (unless a different temperature is noted) referenced to water at 39.2 °F (4 °C)
RGasD	Relative density of gases referenced to air = 1 (indicates how many times a gas is heavier than air at the same temperature)

When available, the flammability/combustibility of a substance is listed at the bottom of the chemical and physical properties section. The following OSHA criteria (29 CFR 1910.106) were used to classify flammable or combustible liquids:

Class IA flammable liquid	Fl.P. below 73 °F and BP below 100 °F.
Class IB flammable liquid	Fl.P. below 73 °F and BP at or above 100 °F.
Class IC flammable liquid	Fl.P. at or above 73 °F and below 100 °F.
Class II combustible liquid	Fl.P. at or above 100 °F and below 140 °F.
Class IIIA combustible liquid	Fl.P. at or above 140 °F and below 200 °F.
Class IIIB combustible liquid	Fl.P. at or above 200 °F.

Incompatibilities and Reactivities

This entry lists important hazardous incompatibilities or reactivities for each substance.

Measurement Methods

The section provides a source (NIOSH or OSHA) and the corresponding method number for measurement methods which can be used to determine the exposure for the chemical or substance. Unless otherwise noted, the NIOSH methods are from the 4th edition of the *NIOSH Manual of Analytical Methods* (DHHS [NIOSH] Publication No. 94-113 and supplements. If a different edition of the *NIOSH Manual of Analytical Methods* is cited, the appropriate edition and, where applicable, the volume number are noted [e.g., II-4 (2nd edition, volume 4)]. The OSHA methods are from the OSHA Web site ("http://www.osha-slc.gov/dts/sltc/methods/".) "None available" means that no method is available from NIOSH or OSHA.

Each method listed is the recommended method for the analysis of the compound of interest. However, the method may not have been fully optimized to meet the specific sampling situation. Note that some methods are only partially evaluated and have been used in very limited sampling situations. Review the details of the method and consult with the laboratory performing the analysis regarding the applicability of the method and the need for further modifications to the method in order to adjust for the particular conditions.

Personal Protection and Sanitation

This section presents a summary of recommended practices for each substance. These recommendations supplement general work practices (e.g., no eating, drinking, or smoking where chemicals are used) and should be followed if additional controls are needed after using all feasible process, equipment, and task controls. Each category is described as follows:

SKIN:	Recommends the need for personal protective clothing.
EYES:	Recommends the need for eye protection.
WASH SKIN:	Recommends when workers should wash the spilled chemical from the body in addition to normal washing (e.g., before eating).
REMOVE:	Advises workers when to remove clothing that has accidentally become wet or significantly contaminated.
CHANGE:	Recommends whether the routine changing of clothing is needed.
PROVIDE:	Recommends the need for eyewash fountains and/or quick drench facilities.

First Aid

This entry lists emergency procedures for eye and skin contact, inhalation, and ingestion of the toxic substance.

Recommendations for Respirator Selection

This section provides a condensed table of allowable respirators to be used for those substances for which IDLH values have been determined, or for which NIOSH has previously provided respirator recommendations (e.g., in criteria documents or Current Intelligence Bulletins) for certain chemicals. There are, however, 186 chemicals listed in the *Pocket Guide* for which IDLH values have yet to be determined. Since the IDLH value is a critical component for completing the *NIOSH Respirator Selection Logic* for a given chemical, the *Pocket Guide*does not provide respiratory recommendations for those 186 chemicals without IDLH values. As new or revised IDLH values are developed for those and other chemicals, NIOSH will provide appropriate respirator recommendations. Updated information on the *Pocket Guide* can be found on the NIOSH Web site (http://www.cdc.gov/niosh/npg/) and will be incorporated into subsequent editions of the *Pocket Guide*. [Appendix F contains an explanation of the "Effective" IDLHs used for four chloronaphthalene compounds.]

In 1995, NIOSH developed a new set of regulations in 42 CFR 84 [PDF] (also referred to as "Part 84") for testing and certifying non-powered, air-purifying, particulate-filter respirators. The new Part 84 respirators have passed a more demanding certification test than the old respirators (e.g., dust; dust and mist; dust, mist, and fume; spray paint; pesticide) certified under 30 CFR 11 (also referred to as "Part 11"). Recommendations for non-powered, air-purifying particulate respirators have been updated from previous editions of the *Pocket Guide* to incorporate Part 84 respirators; Part 11 terminology has been removed. For more information concerning the selection of N-, R-, or P-series (Part 84) particulate respirators click here.

In January 1998, OSHA revised its respiratory protection standard (29 CFR 1910.134). Among the provisions in the revised standard is the requirement for an end-of-service-life indicator (ESLI) or a change schedule when air-purifying

respirators with chemical cartridges or canisters are used for protection against gases and vapors [29 CFR 1910.134(d)(3)(iii)]. requirement.) In the *Pocket Guide*, air-purifying respirators (without ESLIs) for protection against gases and vapors are recommended only for chemicals with adequate warning properties, but now these respirators may be selected regardless of the warning properties. Respirator recommendations in the *Pocket Guide* have not been revised in this edition to reflect the OSHA requirements for ESLIs or change schedules.

Appendix A lists the NIOSH carcinogen policy. Respirator recommendations for carcinogens in the *Pocket Guide* have not been revised to reflect this policy; these recommendations will be revised in future editions.

The first line in the entry indicates whether the "NIOSH" or the "OSHA" exposure limit is used on which to base the respirator recommendations. The more protective limit between the NIOSH REL or the OSHA PEL is always used. "NIOSH/OSHA" indicates that the limits are equivalent.

Each subsequent line lists a maximum use concentration (MUC) followed by the classes of respirators, with their Assigned Protection Factors (APFs), that are acceptable for use up to the MUC. Individual respirator classes are separated by diagonal lines (/). More protective respirators may be worn. "**Emergency or planned entry into unknown concentrations or entry into IDLH conditions**" is followed by the classes of respirators acceptable for these conditions. "**Escape**" indicates that the respirators are to be used only for escape purposes. For each MUC or condition, this entry lists only those respirators with the required APF and other use restrictions based on the *NIOSH Respirator Selection Logic*.

In certain cases, the recommended respirators are annotated with the following symbols as additional information:

*	Substance reported to cause eye irritation or damage; may require eye protection
£	Substance causes eye irritation or damage; eye protection needed
¿	Only nonoxidizable sorbents allowed (not charcoal)
†	End of service life indicator (ESLI) required

All respirators selected must be approved by NIOSH under the provisions of 42 CFR 84. [PDF] The current listing of NIOSH/MSHA certified respirators can be found in the *NIOSH Certified Equipment List*, which is available on the NIOSH Web site (http://www.cdc.gov/niosh/npptl/topics/respirators/cel).

A complete respiratory protection program must be implemented and must fulfill all requirements of 29 CFR 1910.134. respiratory protection program must include a written standard operating procedure covering regular training, fit-testing, fit-checking, periodic environmental monitoring, maintenance, medical monitoring, inspection, cleaning, storage and periodic program evaluation. Selection of a specific respirator within a given class of recommended respirators depends on the particular situation; this choice should be made only by a knowledgeable person. **REMEMBER:** Air-purifying respirators will not protect users against oxygen-deficient atmospheres, and they are **not to be used in IDLH conditions.** The only respirators recommended for fire fighting are self-contained breathing apparatuses that have full facepieces and are operated in a pressure-demand or other positive-pressure mode. Additional information on the selection and use of respirators can be found in the *NIOSH Respirator Selection Logic* (DHHS [NIOSH] Publication No. 2005-100) and the *NIOSH Guide to Industrial Respiratory Protection* (DHHS [NIOSH] Publication No. 87-116).

Exposure Route, Symptoms, Target Organs

Exposure Route

This section lists the toxicologically important routes of entry for each substance and whether contact with the skin or eyes is potentially hazardous.

Symptoms

This entry lists the potential symptoms of exposure and whether NIOSH considers the substance a potential occupational carcinogen.

Target Organs

This entry lists the organs that are affected by exposure to each substance. For carcinogens, the type(s) of cancer are listed in brackets. Information in this section reflects human data unless otherwise noted.

Selection of N-, R-, or P- Series Particulate Respirators

1. The selection of N-, R-, and P-series filters depends on the presence of oil particles as follows:

- If no oil particles are present in the work environment, use a filter of any series (i.e., N-, R-, or P-series).

- If oil particles (e.g., lubricants, cutting fluids, glycerine) are present, use an R- or P-series filter. **Note: N-series filters cannot be used if oil particles are present.**

- If oil particles are present and the filter is to be used for more than one work shift, use only a P-series filter.

Note: To help you remember the filter series, use the following guide:

N for **N**ot resistant to oil,

R for **R**esistant to oil,

P for oil **P**roof.

---

2. Selection of filter efficiency (i.e., 95%, 99%, or 99.7%) depends on how much filter leakage can be accepted. Higher filter efficiency means lower filter leakage.

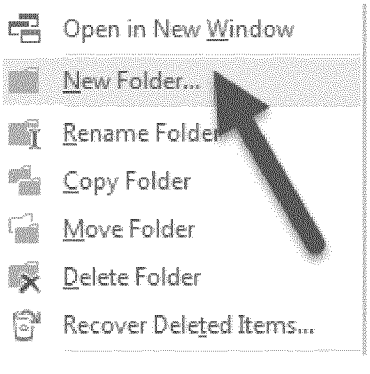
3.The choice of facepiece depends on the level of protection needed - that is, the assigned protection factor (APF) needed.

See Recommendations for Respirator Selection for more information.

DRAFT

FOIA Keyword Search Tips

Step 1.



Preparation

In order to comply with the many recent FOIA requests, we wanted to give everyone an easy to follow set of instructions for conducting these searches. We at DTMB are still working through the process of setting up a central collection site for each agency. In the interim, we advise each of you take the following steps to prepare for collection.

- Create a folder in your Outlook mailbox called FOIA
- Use the method outlined below to retrieve the affected emails
- Drag and drop the emails you have identified into the FOIA folder you have created
- Await instructions as to how these will be collected

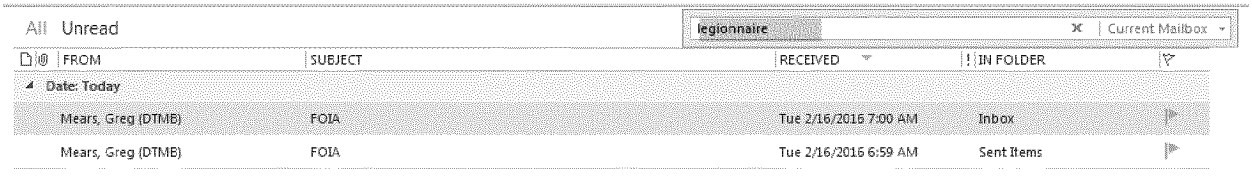
Step 2. Create your FOIA Folder

Create a new folder by **right clicking** on your cabinet, or your mailbox (your @michigan.gov account). Click on the "New Folder" icon. Call the new Folder FOIA, and press Enter.

The new folder should now be created in your account

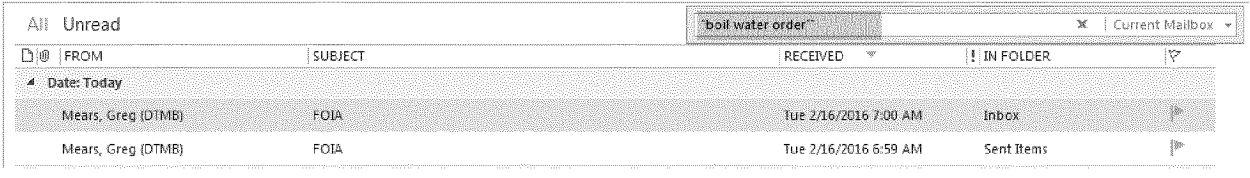
This is the folder that you will drag and drop the relevant emails to when you conduct your search. In our next section we'll give you some tips to assist you in searching your mailbox for relevant items

Step 3. Identifying emails using keyword search



The first step in preparing for your FOIA keyword search is to make sure you have the keyword list available. This list should have been provided to you by the AG, or your management. In the screenshots below we will walk you through the process of identifying the emails, and in later steps how to move them to a special storage folder. Your screens may not look identical to mine, but the methodology is the same for Office 201, and 2013.

First off, locate the search box in Outlook (typically in the upper right hand corner). Make sure that your search is set to "Current mailbox" as seen here. The reason we ask you to do the searches in this manner is that it will search your entire mailbox (received and sent items) including Lync/Skype conversations.



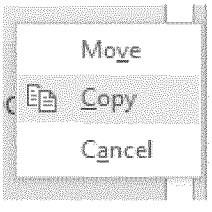
In the examples were going to show we will be doing the word searches one at a time. In testing we found that trying to do multiple word searches, did not give the results we were looking for.

Let's start with a simple one from the keyword search I was provided. In this instance I entered the word legionnaire, and received these results.

Let's try another using a search term in "quotes". By placing an item in quotes it will limit your search to those exact words.

NOTE: By design Microsoft limits the number of items that can be retrieved in a single search to 250. This means that if your search results in more than 250 items you will have to repeat the search process until you have identified all of the emails you wish to address.

As you complete each key word search, you will need to copy those emails to your FOIA folder for retrieval at a later time. We will go over those steps in the next section.



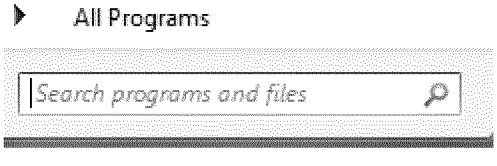
Step 4. Copying your messages to the designated FOIA area

Now that you have identified the emails that meet the search criteria, you'll want to save them off to your newly created "FOIA" folder.

NOTE: Your agency may have you save these items to an alternately designated space. That space can take the form of a network drive, USB flash or portable hard drive. Where ever you choose to store them, the "mechanics" of doing so will not change.

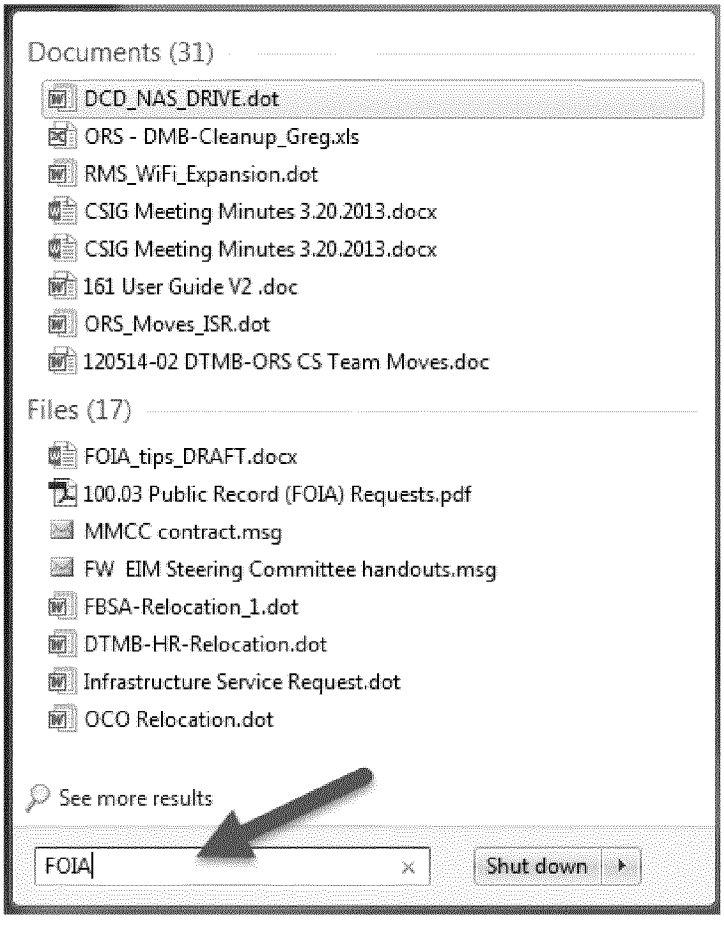
Once you have identified the emails that you want to save, highlight all of them by clicking on the first message, then holding down the Control Key, followed by the letter "a". Next, open up the folder or drive where you wish to save these messages. Using our example above I have created a folder in my Outlook account called FOIA and will save the messages there.

Move your mouse to all of the highlighted message and do a RIGHT CLICK, and then while holding down the right mouse button drag all the messages to where you want to store them. When your mouse pointer arrives in the area you want to save them, release the button and select "copy" from the pop up menu (See illustration)



Depending on the amount of messages you're copying and where you are copying them to, the process can take a few seconds, or many minutes if they include attachments. Once the copy process has completed, you will see the emails you moved appear in the area you stored them.

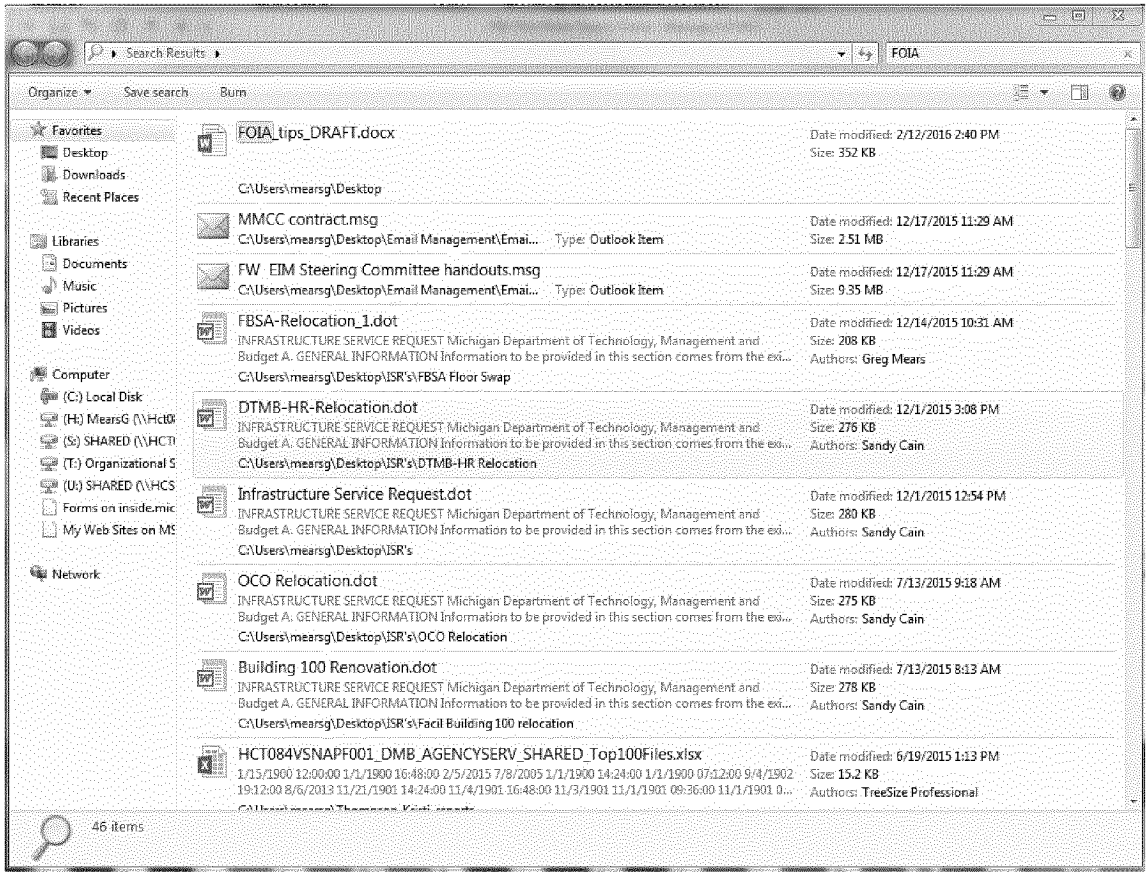
Step 5. Doing a hard drive keyword search for documents and other items



Conducting a hard drive search is fairly simple. Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer", you see it every time you open up a folder on a network drive, or on your own computer. Before conducting your searches, we would suggest that you create a special folder on your desktop called FOIA where you may copy the items you find until final instructions are issued as to their disposition.

Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples I'll be showing are on that operating system. If you click on windows Start button, you'll see the search box right next to it



In this example I'm going to search my computer for the word FOIA. As you can see my search yielded numerous documents including emails. Since I've already saved off all of the relevant emails, we'll focus on just the documents.

This part can be a bit time consuming but we suggest you open each document to make sure that it's relevant. In this instance my search brought up a DTMB Move form, but only because it has the word FOIA in the form. (*Your agency may have slightly different guidelines, please follow them and use this example search as a training tool*)

You'll notice that the words "See more results" appears at the bottom of the list. This means that my search turned up a lot more documents than what can easily be displayed. If I click on the link, it will open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example my search found 46 items. We can now select them all using the "Ctrl-A method" that we used for the emails, and copy them to our newly created FOIA folder.

Conclusion

This is the simplest, we could devise to help those of you conducting the FOIA searches. We hope that this will make the task a bit easier

What If I have questions?

If you have any questions please contact your Agency FOIA Coordinator, or Client Specialist.

DTMB-Client Specialists

Greg Mears – mearsg@michigan.gov 517-284-4524

Eric Stanaway – stanawaye@michigan.gov 517-373-8795

All – below are the list of searches we would like you to use in order to try to find the most relevant documents related to the Flint water crisis. Thank you again for your assistance. Because of the late timing for getting you this list, you may wait until Tuesday to send Travis Weber your estimates of time it takes to search this. Please remember that employees should search their hard drives as well as their e-mails, and that means DTMB cannot perform this search for you; your own folks who may have documents will have to do so from their machines. Thank you again for all your assistance and efforts.

"Flint" and "water" (same document)
Legionnaire
Legionella
"boil water order" & "Flint" (anywhere in document)
"coli" & Flint (anywhere in document)
"bacteria" & "Flint" (anywhere in document)
"microb" & "Flint" (anywhere in document)
"TTHM" & "Flint" (anywhere in document)
"Lead" & "Flint" (anywhere in document)
"emergency" & "Flint" (anywhere in document)
Karegnondi
"Genesee County Health Department"
"Flint" (within sentence) "utilities"
"Lead and Copper Rule"
"Detroit Water and Sewerage Department" & "Flint" (anywhere in document)
"DWSD" & "Flint" (anywhere in document)
"Flint River"
"Pb" & "water" (anywhere in document)
"KWA"

What the Results Mean:

The "Result" numbers tell you how much Copper and Lead was found in the water sample from the faucet that was tested.

These numbers are reported in parts per billion (ppb), which is a type of measurement labs use.

- If the result for Copper is "0" that means that Copper levels in this sample were lower than 50 ppb.
- If the result for Lead is "0" that means that Lead levels in this sample were lower than 1 ppb.
- No amount of lead is safe in your body, but when lead results are over 15 ppb in drinking water, the EPA requires action by the city to reduce that number.

Regardless of your resultsEven if your test results are low, MDEQ suggests youwe advise:

- Continue to use a water filter on this faucet for all drinking, cooking, and washing of fruits and vegetables
- Only brush kids' teeth with filtered or bottled water
- Only give pets filtered or bottled water to drink

Please note, oOther faucets in your home may have higher levels of lead - even if this your test sample result from this faucet was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

You can use unfiltered tap water for washing your dishes, clothes, and for cleaning yhour house. You can also shower and give kids baths. Try to keep kids from getting the bath water in their mouths. No amount of lead is safe for kids.

If your lead result *is higher than* 150 ppb:

- **Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted by them)**
- **Only use bottled water for drinking if you are pregnant**
- **Only use bottled water for baby formula or drinking water for children**

Please note, oOther faucets in your home may also have higher levels of lead. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

You can use unfiltered tap water for washing your dishes, clothes, and for cleaning hour house. You can also shower and give kids baths. Try to keep kids from getting the bath water in their mouths and limit bath time. No amount of lead is safe for kids.

No matter what your lead test result is, you should continue to use a filter for drinking and cooking until the Public Health Emergency Declaration
